The city council has not attended properly to its duty in regard to legislation required to enforce better provisions for safety in case of fire in buildings generally throughout the city. It has been known a sufficiently long time that such legislation was required, and the matter should have been attended to in time to get the legislation at the present session of the house. Since that has not been done, some one or more of the aldermen should take the matter in hand and insist that the necessary steps are taken before the next session of the legislature. the power which makes the world go round the power which makes the world go round the power which makes the world go round has always neutralized some of the artificial distinctions of society. Away from the competitive struggle, individuality has a chance. The greatest power of concentration guides the family fortunes, whether its possessor be man or woman. But, though charsessor be man or woman. But, though charsessor be man or woman as the power felt.

Every disadvantage which the modern woman finds in her home and her outside work is a survival of the old brute force idea, supported by the theological tradition of a superior and an interior sex.

Evolution is eliminating these persistent conventions, but so imperceptibly that few guess the trend of these slight changes until they look back critically over half a century or so. Men and women should pause occasionally to take this illuminating retrospect; and women particularly need the somfort which comes from the sense of progress made. We have run a long lap from the corn-grinder; but we still bear disabling burdens, among which is a keen perception of what our burdens are.

We would not undervalue the inherent advantages which Nature gives to women, and we believe them as great, though no greater, than those she assigns to men; but, until the artificial restrictions on our development are removed, we cannot but feel that we are handicapped in the race of life. If you doubt it, just ask the first man you meet how he would like to change his sex.

A DARING HOLDUP

Sleeping Car on Southern Rail way Held Up by Bandits and CHAS. McCONNELL, 577 to 579 Main Street Passengers Robbed.

Mexico City, Mexico, May 20.—News just received here states that the occupants of two sleeping cars attached to: train which left this city Saturday for Vera Cruz were held up by two negroes and at the point of a pistol relieved of their money and valuables amounting to about \$1,000. The robbers entered the train at midnight while it was detained at Apizaco in the state of Tallicala, by heavy washouts. When the robbers entered everyone aboard had retired. One of the doors of the coaches was locked while at the other stood an armed guard covering the aisle with two revolvers. The other negro made the round of the berths and held up the individual passengers at the end of a pistol. When the negroes had completed their work they locked the passengers in and escaped. One of the porters on the train was arrested at Apizaco for alleged complicity.
