BRITISH PARLIAMENT.

Debate on the Address in Reply to the Speech from the Throne Resumed.

Sir William Vernon Harcourt and the Colonial Secretary the Principal Speakers—

Mr. Chamberlain Pays a Glowing Tribute to the Colonies.

LONDON, Feb. 6.—There was a multiplicity of war questions in the house of commons today, but little interest was taken in them.

The debate on the address in reply to the speech from the throne was then resumed by Sir William Vernon-Harcourt (liberal) who declared the war was due to a reversal of the policy laid down by the government in 1881 and 1885.

Hon. Joseph Chamberlain followed. The house was packed and several members of the United States embassy were present. The orator spoke for forty minutes, dwelling on the broad issues and not dealing so much with details. He was enthusiastically cheered by the unionists and occasionally interrupted by the Irish members of Mr. Chamberlain's party.

Mr. Chamberlain admitted that a critical state of the war had been reached and that the situation was undoubtedly serious, though he did not believe the country was in danger. He refused to discuss the South African question further, declaring that the future of the colonies and the promise of the future federation of the empire, evoked intense enthusiasm.

Mr. Chamberlain asserted, "there was again the Boers erect in the heart of South Africa a citadel whence to proceed to dismember the empire. Never again shall they be able to endanger the paramountcy of Great Britain. Never again shall they be able to treat an Englishman as though he belonged to an inferior race."

Mr. Chamberlain was in the proposition that the war was necessary, and said the opposition proposed, and for the war was unjust, and unnecessary, and then vote for its vigorous prosecution. The war, the secretary declared, would be avoided, except by the absolute surrender on the part of Great Britain of all her rights in the empire.

Mr. Chamberlain said, "I am not anxious to dispute as to the blame of the war, but I am anxious to point out that the war was avoidable, and that the policy of that sort was to unite the empire, but in the eyes of Europe, it threw doubt upon the union of the United Kingdom."

Mr. Chamberlain said, "I am not anxious to dispute as to the blame of the war, but I am anxious to point out that the war was avoidable, and that the policy of that sort was to unite the empire, but in the eyes of Europe, it threw doubt upon the union of the United Kingdom."
