

## THE WEATHER.

Maritime—Fresh west to southwest winds; fair; stationary, or slightly higher temperature.

Toronto, Nov. 17.—Pressure is highest tonight in the south-east states and comparatively low over the rest of the continent. Rain has fallen today in eastern Nova Scotia, and snow very locally in Southern Alberta. Elsewhere in Canada the weather has been fair, moderately cold in Alberta and Saskatchewan, and mild in the other provinces.

Minimum and maximum temperatures:

City	Min.	Max.
Vancouver	32	42
Edmonton	20	30
Calgary	25	30
Pasadena	29	39
Seattle	33	37
Winnipeg	40	52
Parry Sound	30	42
London	31	50
Toronto	31	50
Kingston	32	48
Ottawa	28	44
Montreal	28	44
Quebec	18	38
St. John	30	44
Halifax	24	40

Washington Forecast.  
New England—Fair and warmer Tuesday; Wednesday increasing cloudiness; probably rain by night; moderate southwest to south winds.

## AROUND THE CITY

## An Eloquent Sermon.

His Lordship Bishop Richardson conducted the service in the Anglican church at Westford Sunday when he delivered an eloquent sermon. Mr. Heilmann, private secretary of Hon. J. D. Hazen, was present at the service and sang the solo "Teach me to Pray." Miss L. A. Reice acted as accompanist.

## A Nuisance.

Complaints have been received of the disorderly conduct of boys on Port Howe. The boys are in the custom of congregating on the hill and causing annoyance to residents and pedestrians in the vicinity. Residents have sought the service of the police to put a stop to the matter.

## Temple Fair.

Another large crowd attended the Temple fair last night and enjoyed the features provided. The Temple of Honor Band was in attendance and furnished a pleasing programme. The following were the prize winners: Gents' bean board, H. L. Marcks; ladies' bean board, Mrs. McCormack; bowling, Robert Armstrong; ping pong, J. Cook; ping pong, G. Moore; plate games, W. J. Devenney; nine pins, W. Roberts.

## WOMENS CANADIAN CLUB EXECUTIVE

## Much Satisfaction Expressed Over Work Done During Year—Large Balance on Hand.

A largely attended meeting of the executive of the Women's Canadian Club was held last evening at the residence of Mrs. H. A. Powell, the vice-president. Mrs. E. A. Smith, the president, presided. Before taking up the regular business the executive expressed great satisfaction over the various reports submitted to the annual meeting, and it was decided to have them published along with the report of the historian. During the year 298 new members were added, making a total membership of 640. The financial report showed receipts of \$1,871.07 and expenditures of \$1,429.11, leaving a balance on hand of \$441.96. Arrangements were made for the first address of the winter to be held under the auspices of the club. On the evening of November 27th Norton Griffiths, M. P., will deliver an address on Imperial Unity. On this occasion members of the club will be privileged to bring a gentleman of their family.

## A FORCEFUL LECTURE ON SUNDAY SCHOOLS

A large attendance representing the young people's society of the Presbyterian churches of the city assembled in the lecture hall of St. Andrew's church last evening to hear Rev. Alexander Macmillan, D. D., of Toronto, convenor of the General Assembly's Board of Sunday Schools and Young People's Societies. Rev. W. M. Townsend occupied the chair and with him on the platform besides the speaker of the evening were Messrs. C. McN. Steeves, W. D. McKay, and J. H. Murphy, presidents of the young people's societies in St. Andrew's, St. John's and Calvin churches, respectively.

Dr. Macmillan delivered an inspiring address during a forceful manner with the essentials in all church activities. He concerned himself not so much with methods as with the deep and abiding principles, and motives which underlie all method. Dr. Macmillan will leave this morning for Fredericton where he will address a similar gathering this evening. On Wednesday he will speak in St. Stephen and on Thursday in Moncton. Dr. Macmillan has been touring the Maritime Provinces in the interests of the Sunday schools and young people's societies.

## HON. J. D. HAZEN TELLS OF THE SPECTACULAR GROWTH OF THE FISHERIES DEPARTMENT

## Splendid Work of Department of Marine and Fisheries for Development of Canada, Told by Minister in Address before Canadian Club Last Evening.

At a luncheon held by the Canadian Club in Bond's last evening, Hon. J. D. Hazen, minister of marine and fisheries, was the guest of honor and addressed the club on the part which his department plays in the development of Canada. Rev. Gustave Kluge, president, introduced the speaker.

Hon. Mr. Hazen's lucid explanation of the workings of this branch of the public service and the statistics which he gave made the lecture one of particular interest. His address was followed with close attention and provided a wealth of valuable information, showing as it did what the department of marine and fisheries stands for in the development of Canada, by the conservation, upbuilding and protection of the dominion's great industry, the fisheries, and the invaluable service which is being rendered by the department in introducing methods which will make for the greater safeguard of navigation, by hydrographic surveys, tidal surveys, by the extension of wireless stations, and establishing and maintaining of life saving stations.

While the department over which he has jurisdiction, Hon. Mr. Hazen explained, is known as the department of marine and fisheries, the work of the department is divided into three sections, that of the marine, fisheries and naval service. He then explained briefly but in a lucid and interesting manner some of the main features of the work which the department is carrying out in these three branches of the services.

One of the important projects which is being carried on under the department is the hydrographic survey of the waterways of the Dominion. It is the impression of some that the admiralty charts are sufficiently complete and adequate, but the fallacy of this has been demonstrated and for the greater safeguard of the navigator, hydrographic charts are being prepared and the department is giving special attention to this work. With the building of vessels of a larger type with changed conditions caused by tidal conditions this work has assumed a greater importance and the need for the hydrographic surveys, especially around the Hudson Bay territory, where extensive development is now in progress, has arisen.

The wireless service Another work which comes within the department is the wireless service. As an aid to navigation the wireless is becoming a most potent factor and Canada is to the forefront; she practically surpasses all the nations of the world in applying the wireless as an aid to navigation. The erection of and upkeep of life stations, is another phase of the work with which the department has to do in aiding navigation.

Since the organization of the department of marine and fisheries there has been the same remarkable expansion in this department as in the other branches of Canada's public service.

The Department's Growth In 1868, the year of the organization of the department, there were sixty-seven lights in Ontario and Quebec above Montreal, with fifty-four keepers and six assistants. The expense of these lights was \$40,500. Between Quebec and Montreal, forty-one lights, twenty-nine keepers, three assistants, the upkeep costing \$23,000. New Brunswick had fifteen lights with fourteen keepers and two assistants.

That the growth which has taken place in this particular branch of the department's work in affording greater protection to the navigator may be seen when it is considered that today instead of fifteen lights, New Brunswick has 147 lights with 121 keepers, and there are altogether in the Dominion 1,391 lights with 976 keepers.

Canada's shipping likewise shows a development which is gratifying. Today the Dominion occupies ninth position among the ship owning countries of the world. The merchant marine statistics for the year ending Dec. 31st, 1912, show Canada's register 8,380 vessels, the net tonnage of which was 826,775 tons, an increase of 232 vessels and 65,832 tons over 1911. On these ships it is estimated there are over 40,000 men employed.

The middle decades of the last century were the palmy days of the great shipbuilding industry in New Brunswick, when full rigged ships, barques, brigs and other craft, build of native wood found their way to all corners of the world, and today some of them are still to be found actively engaged in commerce under foreign and British flags, an evidence of the excellence of the material and workmanship of our province. But as the day of the large wooden sailing ship has passed the industry has suffered a decline and whereas in 1874 this province built 48,000 tons of new shipping, in 1912 the output was only 1,092 tons.

The Fisheries Branch Under what may be termed the fisheries branch of the department the principal duty is the administration of the Fisheries Act. Year by year the administration of the regulations bearing on the fisheries is becoming more efficient; legislation having as its object the protection of the fisheries of the Dominion from the outside and from the inside as well as being more rigidly enforced, an educational policy tending to develop and conserve this great natural resource of the Dominion is being carried on under the department and in a word the department's policy aims to introduce the best methods, and regulations which will make for the protection of the fishing industry, and secure efficient administration of these regulations.

In her fisheries Canada has a resource, the possibilities of which have not yet been scarcely touched. Of recent years there has been a better appreciation of this fact on the part of the people of the Dominion, and it is being realized that by the adoption of up-to-date methods, both in the capture of the fish and in their handling the fisheries of Canada will be infinitely more valuable to the country than at present.

The value of the industry in 1906-7

## North America Fish and Game Protective Association will Hold Annual Session.

The thirteenth annual meeting of the North American Fish and Game Protective Association will take place here today and tomorrow. Delegates from all parts of the United States and Canada will likely be in attendance.

Hon. J. D. Hazen, Minister of Marine and Fisheries, is president and men distinguished in different walks of life will read papers. The meetings will be open to the public and will take place in the Board of Trade rooms. The first session will open at 10:30 o'clock.

The association was organized in Quebec thirteen years ago and the annual meetings have taken place in many of the more important cities of North America.

Reports on matters pertaining to fish and game protection are expected at this meeting from every State and Province represented in our membership.

The Hon. J. W. Titcomb, of Vermont, will contribute a paper on the use of copper sulphate for the extermination of objectionable fish in ponds and lakes.

Papers on the following subjects will be read by Professor Prince, Superintendent of Fisheries of the Dominion of Canada:

1. Uniform International Fishery Regulations. Notes of the work of the Commission appointed under the Fishery Treaty, April 11th, 1908.
2. A new source of food-supply for fishes in our waters—(marine and fresh-water.)
3. A few words on behalf of the vanishing Frong-Horn.

William A. Pound, of the Fishery Department, Ottawa, will present a paper on Fish Culture in Canada.

J. J. Cowie, of the same Department, Ottawa, will contribute a paper on Steam Trawling and its bearing on the Fishing Industry.

In addition to the reading of other papers the titles of which have not yet been communicated, the new business to come before the association is likely to include the consideration of the best means of contributing to the success of the movement for the protection of migratory birds, and Wm. S. Haskell, Counsel for the American Game Protective and Propagation Association, has been invited to attend and speak on the subject.

The Hon. J. W. Titcomb, Secretary of the association will be at the Royal Hotel.

E. T. D. Chambers is secretary-treasurer of the association.

## HIGH TEA AT CATHEDRAL

## Hundreds Attend Opening Night and Enjoy Good Time—Booths Prettily Decorated.

The Cathedral high tea, conducted to defray the expenses of the new lighting system installed in the church, was given a most auspicious opening last evening in the York Assembly rooms with an attendance which exceeded the number on the opening evening of all previous high teas under the auspices of the Cathedral parish for some years.

The supper tables were busy from early evening until about eight o'clock, and in all a total of 500 were served. This, it is said, is the largest number ever served on the opening evening of any Cathedral high tea.

The various attractions are arranged to give more space for display of the booths and making matters much more convenient for the committee workers.

An interesting feature of the tea is a voting contest for the most popular Catholic society of the city in which the St. Vincent led last evening with 165 votes. Each holder of an entrance and supper ticket is given an opportunity to vote in the society contest, and is also entitled to a chance for the \$5.00 door prize.

In charge of committees from the respective societies the supper tables are arranged under the supervision of the A. O. H., St. Anne's, Immaculate Conception and St. Vincent de Paul associations with an efficient band of waitresses.

In the room set aside for the display booths and chandeliers there were beautiful decorations, a blending of various colors; and the room presented a very attractive appearance. The booths received a most generous patronage.

In the heart booth conducted by the Misses Julia and Kate Lawler, gentlemen's prize in the drawing was given William Higgins, heart No. 412. The corresponding heart held by the lucky lady was not accounted for last evening.

The doll table, conducted by Miss Maher and Miss Cotter, was one of the most attractive, the dressed bride and groom attracting much attention.

In the large game room which was the centre of attraction during the evening, the wheel-of-fortune, horses, spin wheel, hoop-la and other sources of amusement kept the attention of those present.

The attendance last evening was most encouraging, and the patronage

## Nickel Plated Tea and Coffee Pots

Won't chip or break. Tinned on the inside. Will last for years.

Tea Pots - - \$1.75 to \$3.60  
Coffee Pots - - 1.95 to 3.75

There are all plated on pure copper.

W. H. THORNE & CO. LTD.  
MARKET SQUARE & KING ST.

## Slater Shoes

All the latest styles and lasts in Men's and Ladies' Boots. Dull, Patent, Kid and Tan. Buttoned and Laced.

Men's \$4.00 to \$6.50 Ladies' \$4.00 to \$6.00
