

It Does More Work for You

Because the feed-opening will take larger charges of hay, because the compound leverage power is greater, because the sweep is shorter, enabling the plunger to give more strokes in a given time, the DAIN PULL-POWER HAY PRESS has much greater capacity than a push-power press.

With the DAIN the horses never complain of heavy draft. There is no pitman or other high obstruction for the horses to stumble over. There is no heavy rebound, no whipping of the tongue to make the horses' necks sore, as with pitman-presses. The simplicity of the compound-leverage construction reduces the draft to the lowest degree. The DAIN is the easy hay press—easy on horses, easy on men.

You can set the DAIN PULL-POWER HAY PRESS quickly anywhere, as it does not need to be level. Because it delivers the bales towards the horses and away from the stack, it can be set at the centre, or at any part of the stack. Thus you do not have to fork the hay so many feet, as with presses you have to set at end of stack. You stand up all the time you are tying, too. Three men with the DAIN can do as much work as five with ordinary press.

Dain Pull-Power Press

The DAIN has no delicate mechanism—no toggle joints—to get out of order. Neither will exposure to the weather cause it to warp, shrink or swell out of shape. It is practically all steel construction. The DAIN is good for more than a lifetime of steady, satisfactory service. We build a belt-power hay press, too, all steel and double-gear.

Now, what is your name? We want to know in order to send you a catalogue explaining our hay presses fully. Please tell us on a post card right away.

QUESTIONS AND ANSWERS. Miscellaneous.

DAMAGE TO HORSE.

I have a gelding valued at about \$180. Some time ago the hired man, in a passion, struck him a blow on the eye, causing a blind eye. Can I hold him responsible, and for how much?

Ontario.

FARMER.

Ans.—You are entitled to recover damages from him. But as to the amount we cannot say. It would be just what the judge or jury might deem reasonable under the circumstances; and the estimate would be mainly based upon the depreciation in value of the animal.

SMALL ONIONS AS SETS.

I have a lot of small onions that grew from seed this year. They are about the size of a ten-cent piece, or smaller. They ripened up early. Can anyone tell me what they will grow? If I set them out in the spring, will I have a crop of good onions, or a crop of seed? I am told they are the same as the Dutch sets you buy to raise large onions.

FARMER'S WIFE.

Ans.—We presume these are Yellow Danvers sets, in which case, if planted out in shallow rows, two to three inches between each set, early in the spring, the majority will produce large onions, the remainder will most likely run up to seed. In order to procure the best results, onion sets should be as small as possible, anything above 4-inch in diameter being liable to run to seed, though much, of course, depends on the season.

MAIN & COLLYER.

SNARING RABBITS—KILLING DOGS.

1. What is the law pertaining to the snaring of rabbits?
2. What is the law pertaining to the killing of dogs which are not your own, but are owned by people nearby, and are frequently seen on your premises without their masters?

Ontario.

AN ENQUIRER.

Ans.—1. The general rule is that they cannot lawfully be snared. But they may be taken by snares by the owner or occupant of any land upon which they can be proved to cause actual damage to trees or shrubs, provided that any killed are to be handed over to the nearest officer of the department for distribution to charitable institutions.

2. They may not lawfully be killed unless endangering sheep. But see your local municipal by-laws, if any, for restraining or regulating the running at large of dogs, and for killing dogs running at large contrary to such by-laws.

SCHOOL TRUSTEES.

A, B and C are trustees of a public school. D is a carpenter. A, B and C hired D to do some work at the school-house, he in turn to hire C to help him do the said work. D hires C, and they go and do the work. When the work is nearly completed, a ratepayer advises A and B that they had better not pay C's wages, or they might have to pay it from their own pocket, and C would be unseated from the School Board of Trustees as well.

1. Can D collect C's wages from the school section?

2. If the trustees pay D his full account, which includes C's wages, can the ratepayer who advised A and B not to pay C's wages make the trustees pay this money into the school funds again from their own pockets?

3. Is there any way in which C can get his wages and still hold his seat on the Board?

4. Is it necessary for the newly-appointed trustee, at an annual public-school meeting, to take the oath of office, and, if so, who delivers it?

5. Can a man who holds a vote as farmer's son and not as a ratepayer, hold office as a trustee in a rural public school?

A RATEPAYER.

Ontario.

Ans.—1. No.

2. We think so.

3. Not legally.

4. We do not think so.

5. Yes, provided he is a resident farmer's son within the meaning of the Consolidated Municipal Act, 1903, and of the full age of 21 years.

"DAT NEW CENTURY WASHER SUAN DO GET DE DIRT OUT."—Aunt Sallie.

The easy-running principle on which this washer is built is correct, and it will extract every particle of dirt from all descriptions of wearing apparel and household fabrics without injury to the goods, and without the use of acids.

Sold by dealers everywhere.

Cheap Power!

Do you know that a horse costs **three to six times more** than a Gilson "Goes Like Sixty" Engine of like power?

That a Gilson Engine of same cost as a horse will do **four to eight times** as much work?

That the feed of a horse costs **six to ten times more** than a Gilson Engine doing like work? Of course the idle horse keeps eating, but the idle engine costs nothing. Surely you want to know lots about the

GILSON "Goes Like Sixty" ENGINE

The money-making, money-saving helper on the farm. The up-to-date, standard engine with a reputation for quality.
