

The bathrooms which we show in our advertisements are specially designed for those residences where the owners are particular and appreciate all the comforts which can be derived from the better class of bathroom fittings.

They also serve to call attention to the fact that it is not necessary to specify other than Canadian goods, as the very best enamelware in the most pleasing designs is manufactured in our Port Hope plant.

We will be glad to submit a design for a bath-room which will suit the residence you are planning.
