

season. Then too stumps are cut far higher than is necessary and the waste from this source approximates 10,000 cords per annum. A large amount of good pulp wood is wasted in building camps for the men and much is still used for roads although this last waste has been much reduced.

In the mill we still have sawdust, slivers, bark and the waste liquor to find profitable uses for.

### *Dividends from Planting.*

With the growing scarcity of timber and the increasing distance one must go for it with a corresponding increase in costs, our attention must turn to planting: a plantation offers the following advantages. A much smaller area of forest since in planting we use all the land and having only the useful species our yield is very much increased, eight to ten times. The lands near the mill can be utilized and instead of river drives of one to two hundred miles we would have only twenty-five or thirty miles and logging railroads could be profitably built and the wood brought from

**Pulls the Largest Stumps**

**Smith Stump Pullers**

The Smith machine pulls the largest stumps at a cost of 5c each. Write today for free catalog and special offer.

## **YALE UNIVERSITY FOREST SCHOOL**

**NEW HAVEN, CONNECTICUT, U.S.A.**

**YALE** University Forest School is a graduate department of Yale University. It is the oldest existing forest school in the United States and exceeds any other in the number of its alumni. A general two-year course leading to the degree of Master of Forestry is offered to graduates of universities, colleges and scientific institutions of high standing, and, under exceptional conditions, to men who have had three years of collegiate training including certain prescribed subjects. Men who are not candidates for the degree may enter the school as special students, for work in any of the subjects offered in the regular course, by submitting evidence that will warrant their taking the work to their own advantage and that of the School. Those who have completed a general course in forestry are admitted for research and advanced work in Dendrology, Silviculture, Forest Management, Forest Technology and Lumbering. The regular two-year course begins the first week in July at the School camp, Milford, Pennsylvania.
