

**"The greatest convenience on the farm"—**

that's what farmers who own them say about

**Alpha Gas Engines**

AND that is what you, too, will say after you have used one and seen how much time and work it saves.

If you want to cut or grind feed, fill a silo, saw wood, or pump water, or if the women folks want to run the cream separator, the churn or a washing machine, the ALPHA is right on hand ready to do the work—and do it more quickly and more cheaply than you can get it done in any other way.

The ALPHA is a powerful, smooth-running engine which will develop its full rated horsepower on a minimum amount of either gasoline or kerosene. The sensitive governor prevents any waste of fuel from changes in load.

The ALPHA has no trouble-making batteries, but starts and runs on a reliable low-speed magneto. It is so simple that a boy or a woman can start and operate it, and this simplicity means low upkeep cost and exceptional freedom from repairs.

You need a good gas engine on your farm. Send for our illustrated engine catalogue, which describes the ALPHA in detail and tells why farmers who use it get the most for their money.

Alpha Gas Engines are made in eleven sizes, 2 to 28 H. P., and each size is furnished in stationary, semi-portable, or portable style, with hopper or tank-cooled cylinder.

**THE DE LAVAL COMPANY, Ltd.**

LARGEST MANUFACTURERS OF DAIRY SUPPLIES IN CANADA. Sole manufacturers in Canada of the famous De Laval Cream Separators and Ideal Green Feed Silos, Alpha Gas Engines, Alpha Churns and Buttermakers. Catalogues of any of our lines mailed upon request.

**Make Ditching Your Business!**

Right now, while you're thinking how to establish an independent profitable business, the finest chance in the world lies right before you. Everywhere there is wet land that needs underdrainage.

You can do this work with a Buckeye Traction Ditcher; operate 8 or 9 months in the year and clean up more good money than on a 75 acre farm. Conditions of course vary, but a

**"A Perfect Trench at One Cut" BUCKEYE Traction Ditcher**

ordinarily clears a daily net profit of \$15 to \$20. Quite frequently operators do better, but you will admit this is good.

The Buckeye Traction Ditcher cuts a smooth, true trench ready to receive the tile immediately and from 4½ to 12 feet deep, depending on the size of machine. Cuts through frost and hardpan. Apron wheels affording wide bearing area, enable these Ditchers to travel over and operate successfully in swampy lands.

Here is what two Buckeye Operators say their machines accomplished:

"Have been greatly pleased with my Buckeye. Last season I excavated 6673 rods of ditch, averaging 21½¢ per rod. After expenses paid had \$1435.77 net profit for my labor. I can fully recommend the Buckeye Machine to any possible purchaser."  
CARL J. WILLIS,  
Bannister, Mich.

"I bought the ditcher three years ago and have not paid out ten dollars for breakage. Have tiled my farm and have done enough outside work to more than pay back the price of the machine and all expenses, so my tiling cost me nothing."  
L. R. WILES,  
Plymouth, Mich.

Now then, don't delay. Write us at once for a "Book of Facts," telling what the "Buckeye" has done. Tell us what your soil is and the size of ditches you wish to cut—we'll designate the proper machine for you. Our service Department will point the way and show you how to establish yourself firmly in the independent, and highly profitable business of contract tile ditching and be successful from the beginning.

THE ADIRONDACK SILO CO. OF CANADA, LIMITED  
425 Atwater Avenue Montreal, P.Q.

The Bissell Disk takes hold of any soil, and has the "knack" of doing great work. The Disk Plates are of special design—they cut and turn the soil over. The draught is lighter, too, than any other Disk. In fact, you won't find another Harrow that can begin to compare with the record of the Bissell. Write Dept. for free catalogue.
