KELMSCOTT ACROBAT 4 (126217)

The Kelmscott Herd of Pedigree Milking Shorthorns, Flock of Oxford Down Sheep and Stud of Shire Horses

THE PROPERTY OF
Robert W. Hobbs & Sons

Kelmscott, Lechlade, Gloucestershire,
England

SHORTHORN CATTLE

One of the oldest and largest pedigree herds in existence. Milk, flesh and constitution studied. Daily milk records kept. Numerous prizes won for inspection, milking trials and in butter tests. The Gold Medal, Spencer and Shirley Challenge Cups were won at the London Dairy Show in 1914. The fifty Guinea Challenge Cup for the best group of dairy Shorthorns at the Royal Show was won for the third successive year at the last exhibition at Manchester in 1916, also two firsts, one second and one third prize. All cows in milk and the stock bulls have passed the tuberculin test. Bulls and bull calves on sale at prices to suit all buyers.

OXFORD DOWN SHEEP

The flock was established in 1868 and consists of from 1,000 and 1,250 registered Oxfords. Numerous prizes for many years have been won at the principal Shows. At the last Royal Show first prize was taken for a single Ram Lamb and first prize for pen of Ram Lambs. Rams, Ram Lambs and Ewes always on sale.

R. W. Hobbs & Sons are breeders of
high-class Shires. Sound active colts and
fillies always on sale.

TELEGRAM HOBBS, LECHLADE
Inspection cordially invited.

Alloway Lodge Stock Farm

ABERDEEN-ANGUS

The present string of young bulls for sale includes
some classy herd bull prospects, winners them-
selves and sired by champions. If interested in
Angus, write your wants. Visitors welcome.

G. C. CHANNON, Oakwood, Ontario
P. O. and Phone
Railway connections: Lindsay, C.P.R. and G.T.R.

Springfield Farm Angus

I have six bulls from 8 to 15 months. All sired by
Middlebrook Prince 5th, a son of Jock of Glen-
cairns. Four of these are show calves. Also
have other calves younger, and could spare a few
heifers safely bred to same sire.

Bank Buildings, Toronto. Ottawa Office: 5
Elgin St. Offices throughout Canada. Book-
let free.

Questions and Answers. Veterinary.

Inability to Stand Work.

Nine-year-old horse eats and looks
well. I give him 5 quarts of rolled oats 3
times daily and all the hay he will eat.
Just as soon as I commence to work him
he seems to get weak and the sweat drops
off him. My other horses on less food
than he consumes do not appear to sweat
at all under the same conditions.

H. H. P.

Ans.—The symptoms indicate either a
weak heart or an overloaded stomach.
If the heart be diseased little can be done
in most cases. Give him 2 drams of nux
vomica 3 times daily. Restrict the
amount of hay. Give only very little
hay in the morning and at noon, and give
sufficient in the evening to make a fair
ration for the 24 hours. This will avoid
working him when the stomach is loaded.
Most horses will eat too much hay if
allowed to, hence a limited amount should
be given when the animal will be required
for work shortly after a meal. This horse
may be particularly susceptible to the
effects of heat, and may not show the
weakness in moderate weather. Many
horses have died as a result of heat or
sun-stroke during June, while others
under similar conditions have apparently
not suffered acutely.

V.

Miscellaneous.

Caterpillar Destroying Trees.

What will prevent caterpillars from de-
stroying the leaves on walnut trees.

D. C.

Ans.—Spray with Paris green or
arsenate of lead.

Sows Fail to Give Milk.

We have had several sows that, after
farrowing, gave no milk. What is the
cause of this?

F. B.

Ans.—It is a condition which seldom
occurs, and cannot definitely be accounted
for. The sows should be fed on milk-
producing feed, such as oats and bran,
along with a liberal quantity of roots.
If the feed will not start the milk flow,
there is nothing that can be done.

Silo Wall Leaks.

I have a silo inside my stable, but it
has no cement floor. The water soaks
into it. What is a remedy to prevent the
water soaking in?

J. R.

Ans.—If the water soaks in badly and
then does not get away when dry weather
sets in, it shows that there is not good
drainage from the silo. If you want to
keep the water out, it will be necessary
to put in a concrete floor, and then the
walls might be coated with pitch. This
is about the only substance that will aid
in preventing the water from soaking
through the concrete wall.

Warts.

I have a cow with teats covered with
warts. What treatment do you advise?

M. G.

Ans.—If the warts have long necks
they may be removed by tying a silk
thread tightly around them. Applying
castor oil will very often remove the
warts. Using a little butter of antimony
or caustic potash will take them off, but
one must be very careful when using
either of these, as they may cause damage
to the udder by burning. Merely touch-
ing the warts with either of these sub-
stances will likely remove them.

Pasture Land for Wheat.

Would pasture land be suitable for
wheat if plowed in July and worked
down? It has been in pasture for five
years.

R. A.

Ans.—It is quite a common custom to
plow pasture or hay land in July and
sow to wheat. The earlier it can be
plowed the better, as it gives more op-
portunity for making a satisfactory seed-
bed. Many have found it good practice
to give a coating of manure after the
land is plowed. Working it in with the
cultivator or disk keeps it nearer the
surface where the plants are feeding than
if the manure is applied on the grass and
plowed under. Of course, there is a dif-
ference in the texture of the soil. What
might give good results on one kind
might prove a partial failure on another
soil.

Dependability of the DE LAVAL

Now that "dog
days" are with us, it
is no time to bother
with a balky cream
separator.

Dependability in a
cream separator is
especially necessary in
the summer when the
milk should be taken
care of in the shortest
possible time.

The DE LAVAL
Cream Separator is
dependable, and with
ordinary care it will
easily last a lifetime.

The DE LAVAL

capacity rating is dependable. Each size exceeds its ad-
vertised capacity under ordinary, and even under unfavorable,
conditions.

DE LAVAL Service is dependable. Fifty thousand agents
the world over see to it that DE LAVAL Separators are prop-
erly set up, operated and taken care of. And, above all, the
De Laval Company is dependable—the oldest and by far the
largest cream separator manufacturers in the world.

More DE LAVALS in use than of all other makes combined.

See the local De Laval agent, or, if you don't know
him, write to the nearest De Laval office as below.

THE DE LAVAL COMPANY, Ltd.

MONTREAL PETERBORO WINNIPEG VANCOUVER

Ontario Hereford Breeders' Association

J. E. HARRIS, Pres., Kingsville, Ont.

"Hello, Harry! You
know I am wanting to
build up my Hereford
herd, and I would like
your advice as to the
adviseability of buying
private or at sales."

"Well, Bill, I think if I
was you I would wait
till the 12th of Dec.,
when the Ontario Here-
ford Breeders hold their
sale. The good breeders
are holding their best
cattle for this event.
Then you will be able to
pick cattle out of some
of the best families of
Herefords in Canada."

JAMES PAGE, Sec., Wallacetown, Ont.
