

PEOPLE SAID SHE HAD CONSUMPTION

Was in Bed for Three Months.

Read how Mrs. T. G. Buck, Bracebridge, Ont., was cured (and also her little boy) by the use of

DR. WOOD'S NORWAY PINE SYRUP

She writes: "I thought I would write and let you know the benefit I have received through the use of your Dr. Wood's Norway Pine Syrup. A few years ago I was so badly troubled with my lungs people said I had Consumption and that I would not live through the fall. I had two doctors attending me and they were very much alarmed about me. I was in bed three months and when I got up I could not walk, so had to go on my hands and knees for three weeks, and my limbs seemed of no use to me. I gave up all hopes of ever getting better when I happened to see in B.B.B. Almanac that Dr. Wood's Norway Pine Syrup was good for weak lungs. I thought I would try a bottle and by the time I had used it I was a lot better, so got more and it made a complete cure. My little boy was also troubled with weak lungs and it cured him. I keep it in the house all the time and would not be without it for anything."

Price 25 cents at all dealers. Beware of imitations of Dr. Wood's Norway Pine Syrup. Ask for it and insist on getting the original. Put up in a yellow wrapper and three pine trees the trade mark.

FITS CURED

For pamphlet giving full particulars of simple home treatment. 20 years' success. Over 1,000 testimonials in one year. Sole proprietors: Trench's Remedies, Limited, Dublin.

RIPLEYS COOKERS

Recommended and used by Wis., Iowa, Georgia and New Mexico State Experiment Stations. Made of Oat Iron and Heavy Steel. Last for years. Run dairy separators, cook feed, heat hay and poultry houses, etc. Heat water in tanks or cook food 250 feet away. Little fuel needed. Burns coal, coke, wood, etc. as a stove. No fire to trust or leak or of water in 15 minutes. We manufacture the largest line of cookers in America. Cooker and Brooder Supply Catalog Free. Special prices—only allowed Canadian.

Ripley Mfg. Co. Bldg., Box 5, Grifton, Ill., U. S. A. Northern Agents—International Stock Food Co., Minneapolis, Minn.

A maid-servant in the employ of a certain woman was left the other day in charge of the children while her mistress went for a long drive.

"Well, Mary," asked the lady, on her return, "how did the children behave during my absence? Nicely, I hope."

"Nicely, ma'am," Mary answered, "but at the end they fought terribly together."

"Fight! Mercy me! why did they fight?"

"To decide," said Mary, "which was behaving the best."

QUESTIONS AND ANSWERS. Miscellaneous.

LINSEED MEAL FOR HORSES—SOWING MANGELS AND CARROTS WITH GRAIN DRILL—HULLLESS BARLEY.

1. Is linseed meal good to feed with oats to horses, and in what quantities? Would it have any bad effect on their kidneys, or fed to a mare in foal?

2. Would you advise sowing sugar mangels and carrots with a disk grain drill and how?

3. Is beardless, hullless barley a profitable crop? How is it for horse feed? Will it ripen with oats, sown together, and in what proportion would you advise sowing?

Ans.—Linseed meal, if not given in too large quantities, is satisfactory for horses. A handful each time, along with a gallon of oats, is advised by some feeders. The high commercial value of the oil in flaxseed, however, makes it an expensive food. We have experienced, or heard of, no ill effect on kidneys, or injury to mares in foal, when fed in small quantities.

2. Sowing carrots with a grain drill would be too uncertain. Special drills are made for sowing root seeds, and the use of one of these is advisable. Root seeds are too high in price to waste seed, and it is essential that the seed should be evenly placed in order to avoid misses in the rows. Some sow sugar mangels with a grain drill by mixing the seed with coarse sawdust or peas (about one part peas to three parts mangels), and covering all the openings in the grain box except those needed to sow the rows the proper distance apart. With carrots, the nature of the seed would make such practice inadvisable.

3. Successive experiments conducted for six years at Ontario Agricultural College, show the following averages: Mand-scheuri barley, 1.9 tons straw and 2,715 pounds grain; Black Hullless barley, 2 tons straw and 2,527 pounds grain; White Hullless barley, 1.9 tons straw and 1,992 pounds grain. Common barley comprises about 12 or 15 per cent. hull, which is practically worthless from a feeding standpoint. You can draw your own conclusions as to whether or not hullless barley is a profitable crop. Soil conditions and grain requirements will have to be taken into consideration when comparing barley with oats or peas. Hullless barley cannot be recommended as a horse feed. It is a strong feed, and would have to be fed in limited quantities. Some feed it boiled. The Ontario Agricultural College experiments conducted for six successive years, show the average dates of ripening from seeding of the same dates to be: Mand-scheuri barley, August 4; Black Hullless barley, August 4; White Hullless barley, August 7; Alaska oats, August 7; Joannette oats, August 14. You will see, therefore, that much depends on the varieties used. White Hullless barley and Alaska oats would ripen, approximately, at the same time. The proportions used would have to be regulated according to the stock for which you were producing feed. For hogs you could use two-thirds barley, or more, while for horses it would not be wise to have over one-third barley. In fact, it is not advisable to feed such mixture to horses continuously. Cattle do very well on equal parts of barley and oats. In every case, of course, it is well to have the grain ground.

GOSSIP.

Messrs. Henry Arkell & Son, Arkell, Ont., write: Our auction sale of Oxford Down ewes, held on March 15th, was a decided success, there being quite a number of buyers from a distance. Prices ranged from \$15 to \$31. Some six-year-old ewes sold at the former. Everything offered was sold. The sale was ably conducted by Mr. James McDonald, our most prominent stock auctioneer. We may say our retail trade in Oxford Downs in Canada the past season has been very good. They were distributed from Nova Scotia in the East to British Columbia in the West; and we attribute most of these sales to our advertisement in "The Farmer's Advocate."

Shorthorns Clydesdales Yorkshires

BY AUCTION, ON

Friday, April 9th, 1909,
