

"Galt" Shingles

Simplest and Quickest to apply yet invented. Perfectly Square, True and Easy-fitting. The bold Gothic Tile pattern presents a handsome and architectural appearance—unmarred by conspicuous joints. The Shingle with covered nailing flanges both top and side—the one with the new gale-proof, closed-end side lock and continuous overlapping and interlocking bottom lock. Catalog "B-3" tells all about them.

Sales and Distributing Agents: Dunn Bros., Winnipeg and Regina.

The Galt Art Metal Co., Limited, Galt, Ontario.

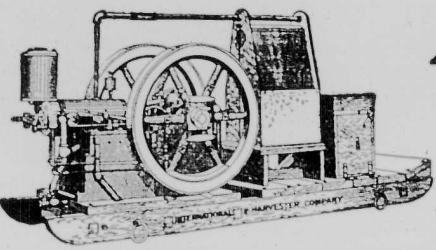

THE FENCE THAT SAVES EXPENSE

Made of all No. 9 Heavily Galvanized Steel Wire—with just enough elasticity to prevent snapping from sudden shocks, etc.

PEERLESS

Fence saves expense because first cost is the only cost. It turns any kind of stock—and weather does not affect it. No repairs. Our free book tells why. Write for it today.

The Barwell Hoxie Wire Fence Co. Ltd., Dept. M., Hamilton, Ont. Winnipeg, Man.

Needed on Every Farm

How a Reliable Engine Economizes Labor

Of course, you, like other farmers, want to economize your time.

Think in how many places a power would be a help to you—would save time and work—if you had it in a handy form ready for use in a minute.

Think how much hard work it would save you in cutting feed—in sawing wood, posts or poles—in running the cream separator or churn—in operating shop or other machinery.

The I. H. C. gasoline engine is a power that is always ready at your hand. It is not necessarily stationary, like the windmill, and on that account adapted to doing only one kind of work.

The engine is built in many styles—there are portable engines on trucks and skidded engines which can be moved wherever the work is to be done. Then there are stationary engines, both vertical and horizontal, in sizes from 1 to 25-horse-power, air cooled and water cooled, and also gasoline traction engines 12, 15 and 20-horse-power. Besides, there are special sawing, spraying and pumping outfits from which you can select an outfit.

The engines are simple in design so that they can be easily understood.

They are strong and durable—constructed with a large factor of safety, inasmuch as they have greater strength than would ordinarily be required. Yet they are not clumsy or too heavy.

All parts are accessible and easily removed and reassembled. Every engine will develop a large per cent of power in excess of its rating—you get more power than you pay for.

They are absolutely reliable—you cannot find one inefficient detail. They are unusually economical in fuel consumption—less than a pint of gasoline per horse-power per hour. This means that a 2-horse power engine will produce full 2-horse power for five hours on only one gallon of gasoline.

Would it not be a wise plan for you to investigate and learn how an I. H. C. engine will save time and lighten the labor on your farm?

International local agents will supply you with catalogs. Call on them for particulars, or write the home office.

International Harvester Company of America, Chicago, U.S.A. (Incorporated)

REGISTERED SHORTHORNS

We imported from Minnesota some Shorthorn heifers, heavy with calf. Should these calves be registered in the Canadian or American herd book? Where is the Canadian herd book kept, and who has charge of it?

Sask. G. B.

Ans.—People who expect to sell in the American market frequently keep their cattle registered in both books, but if it is expected to make most of the sales in Canada, there would be no need to register in the States. In order to register American-bred cattle in the Canadian book, the ancestors back to imported stock would have to be registered. There are, however, a few families of Shorthorns in the States that cannot be recorded in the Canadian book. Put the whole case in the hands of the Accountant, National Records Board, Ottawa.

HENS EATING EGGS

Would you kindly let me hear through your valuable columns of a cure for hens eating their eggs? They are all young pullets, just starting to lay, and I am at a loss to know what to do to prevent it. H. P. Sask.

Ans.—Arrange the nests so that the eggs will be in darkness. This may be done by facing them toward the wall with a narrow passage for entrance, or, if separate nest boxes are used, turn them toward the wall, and hang a piece of old sacking partially across the front. The idea is to keep the egg out of sight. If this does not work, try a false bottom of canvas in the nest, sloping, so that the egg will roll down underneath as soon as laid. Feed vegetable matter, meat and grit.

COLLECTING OLD ACCOUNT

In the winter of 1907 I did considerable work for a homesteader in the way of hauling lumber and coal, supplied him with grain, and beef, etc., so that now he owes me quite a large bill, which he will not pay. He keeps putting it off, even when he has money. He will prove up on his homestead in about six months. How can I force a settlement? Alta. B. E. C.

Ans.—Give the case to a lawyer to make the collection, or to get some satisfaction. It is rather hard to collect under the circumstances as you have no lien against the chattels, and a homesteader's stock and equipment are exempt from seizure. Perhaps you will have to wait and seize his crop next fall.

ORIGINAL BREED OF CATTLE

1. Can you tell me through your columns which is the original breed of cattle? Where can I get a book on the different breeds of horses and cattle? Is it possible to get a typical Polled Angus beast from any other breed than the Polled Angus? Are the Herefords and Shorthorns an original breed, or are they a graded breed?

2. A neighbor summer-fallowed some land in the year 1907, and harrowed it well through the growing season at intervals of a week or ten days. In 1908 he cropped it, and in a short time it was choke full of weeds. How was it those weed seeds did not germinate in the summer of 1907? Do you think it was for want of moisture and the soil being too loose, through not being rolled or packed?

Sask. G. B.

Ans.—1. All cattle are supposed to have been developed from one original breed, but this original breed has now, as a distinct class, entirely disappeared. In England they have some so-called wild white cattle, believed to be of direct descent from the original cattle, or they may be an early developed breed. The various breeds of beef and dairy cattle have been derived by grading and crossing on the original stock. You cannot get a typical Polled Angus

Don't Paint The Roof

All the expense of painting a roof may be saved by covering it with

Brantford "Crystal" Roofing

—and the cost will be one-third less than for wooden or metal shingles

You certainly owe it to your pocketbook to learn more about this wonderful roofing. You should have a sample. Then you can test the flexibility and toughness of Brantford "Crystal" for yourself—and see with your own eyes its time-defying Surface of Rock Crystals. A surface that cannot be improved upon for weather-and-fire-proofness. A surface that needs no painting at the start and never will, as rock crystals cannot dry out, crack, freeze, or melt—practically indestructible.

Sample, and big roofing book, will be mailed FREE as soon as we hear from you, which should be by next mail.
