

he should be able to use the elevator for that purpose, and his shipping in this manner does not in any way delay transportation or in any way place him at a disadvantage with his neighbor in securing a car.

The great outstanding feature of the whole question is that the elevator companies desire to purchase as much grain on street as possible. A close analysis of the whole struggle in Manitoba and Saskatchewan between the producers and the grain interests, can, with a great deal of truth, be said to hinge on whether the farmers would have the privilege of shipping their own grain in car lots, or be compelled to sell it to the elevator companies on street.

The elevator companies (and railways and banks too, for that matter) have done everything possible to discourage car lot shipping by farmers. Why so? It requires a far reach of the imagination to believe that they are doing this in the public interest, especially when we in Manitoba and Saskatchewan remember the wretched conditions in the sale of grain that existed before the present distribution clause came into effect. It is extremely difficult, even under the present law, to tie the elevator companies down to a strict observation of it, and if the way was opened to have every farmer who sells a few loads of grain go to the railway agent and order a car to be placed at the elevator where he made sale of his grain, a condition of things would be introduced which would without question work against the producer. These are plain, stern facts which cannot be disputed.

Our western farmers should also not lose sight of the fact that by enabling the elevator interests to retain control of the grain, they give them the opportunity to control competition and thus manipulate the values in the larger field of exporting which will invariably be used for their own enrichment, regardless of the interests of the farmers who grow it.

SYNOPSIS OF THE CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 20, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Application for entry must be made in person by the applicant at a Dominion Lands Agency or Sub-Agency for the district in which the land is situate. Entry by proxy may, however, be made at any Agency on certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.

DUTIES—(1) At least six months residence upon and cultivation of the land in each year for three years.

(2) A homesteader may, if he so desires, perform the required residence duties by living on farming land owned solely by him, not less than eighty (80) acres in extent, in the vicinity of his homestead. He may also do so by living with father or mother, on certain conditions. Joint ownership in land will meet this requirement.

(3) A homesteader intending to perform his residence duties in accordance with the above, while living with parents or on farm land owned by himself, must notify the Agent for the district of such intention.

W. W. CORY,

Deputy Minister of the Interior.

Make Denatured Alcohol for 8 Cents a Gallon

The navies of the world adopted tax-free commercial Alcohol for smokeless motive power.

Enormous savings have been perfected by utilizing vegetable waste matter for light, heat, and motive power, but now that deoxidized natural gas, sawdust, wood syrup and lime produces Denatured Alcohol so cheaply as 8 cents per gallon for ships, the saving of coal room, boiler room, handling of fuel, a clean, odorless, smokeless motive power for motor boats and automobiles—and the navies of the world use it. Just think: 85 per cent. of water the principal part of which is converted into alcohol by chemical action in contact with fermented vegetable waste and deoxidized natural gas, or any carbo-hydrates, etc., combining with 94 per cent. oxygen or atmospheric air when used for motive power, light or heat purposes. It opens an absolute new market for sawmill waste, paper, pulp and chemical fibre mill waste products—the use of natural gas and

for millions of tons of farm product that even the world's greatest monopoly cannot touch. Our Denatured Alcohol Distilling Apparatus is constructed of steel plate galvanized and the highest grade seamless copper tubing tested to 300 lbs. pressure. Its conductivity makes possible the instantaneous the hot steam alcohol distilling with a very simple but serviceable still and doubler that will produce Denatured Alcohol for 8 cents a gallon. A 100 to 120-gallon capacity every 24 hours, weighs complete 985 pounds and costs \$550.00. A smaller 60 gallons daily capacity weighs 520 pounds and costs \$285.00. No government taxes, no government supervisal, no speculative features. The market demands the product. Unquestionable references. We are ready to negotiate with responsible individuals on very liberal terms. Do you want to be a good, progressive fellow? Establish this new infant industry at home. It will yield a most profitable income. Address—

The Continental Natural Gas Alcohol Co.
