ookout mountain. . A. Kirk, acting in, miner's certifi-Gust M. Paterson,

date hereof, to order for a certi , for the purpose

tice that action be commenced h certificate

There are two veins on the Josie and one on the No. 1. The shaft on the Josse is down 635 feet and the shaft on the No. 1 has reached a depth of 864 feet. A station is now using cut out on the 840-foot level. Both the Jesie and No. 1 are a part of the property of the LeRoi No.

2 company. Ross and Bon nza.-Mr. Stephen J. Brailo returned from the Norway mountain section yesterday. He is in charge of the work on the Rossland Bonanza company's properties. He reports that the work of development is going on in a satisfactivy manner on the Rossland satisfactive manner on the Rossiand Bonanza. The drift tunnel is in for 230 feet and the showing of ore continues to be of a satisfactory character. The force is to be increased to three shifts just as soon as the trails are free of snow, so that supplies can be taken in. Then a winze will be sunk on the richer part of the pay sh ot, and at the same factory manner in which the Le Roi No. 2 is developing. Ore is being shipped from this mine at the rate of 200 tons per day and were the facilities at hand for reducing the ore this quantity could be impediately increased to 400 tons and later mediately increased to 400 tons and later to a still larger quantity. The Le Roi No. 2 has not nearly reached the pay shot, and at the same time the drift tunne will be continued. It is expected that work on the road from the Columbia & Western railway to the Ross'and Bonanza and Cascade mines will be commenced within a few weeks. The government has made a grant of \$5,000 for this purpose and it is be seved a good wagon road can be put in for that amount.

a still larger quantity. The Le agood wagon road can be put in for that work has been duction of its output it will be numbered and the ore bodies both to the east and many the more valuable mines of the camp, for it is certain to have a good perimental shipments made as a prelimination. dividend making capacity. inary to regular shipments later on.

The shipments this week are 11,660 Spitzee.—The work of unwatering the

The snipments this week are 11,000. Spitzee.—The work of unwatering the tons, and which is the banner record for shaft was commenced with a bucket and the camp in any one week. Should nothing unusual occur to prevent it and should was finished on Wednesday. The water matters in the mines run along as at present it is more than probable that the shipments for the year will easily reach the grand total of half a million tons.

The Output.

was finished on Wednesday. The water which was in the workings about all came from the surface, and this is shown by the fact that little or no water is coming in at present. Messrs. Gill and Post have taken a contract to deepen the company of the comp the shart from the 65-foot level to the All previous records of shipments from 100-foot level and to drift along the vein this camp were broken during the past on the 100-foot level for 25 feet. management have every faith in the future of the Spitzee and believe that conday the tonnage was 11,000, a gain of ture of the Spitzee and believe that con-over two thousand tons over the next siderable ore of a shipping grade can be highest record made for the week of stoped from above the 100-toot level. day the tonnage was 11,660, a gain of March 16th, when 9,174 tons were Cascade.—Work on the Cascade will be despatched to the Trail and Le Roi resumed as soon as the trail is in condismellers. These figures are compiled tion to be packed over, which will be in iron the shipping books of the respective in a few days. The intention is to drift railways, and are approximately correct. along the ore shoot and stipe ore and al Unly the caricad shipments are given, so to make an upraise from the tunner but the totals are easily obtained when level to the shaft, a distance of 70 feet. one is aware of the capacity of each car.
This upraise is needed to furnish a good corrected recurns in pounds are available a few days later; and it frequently are available a few days later; and it frequently has a good surface show-

quently happens that the original neturns ing of ore and a continuous ledge and is have been underestimated. The carry-thought to be one of the best in that my capacity of the C. P. R. ore cars section.

The Le Roi this last week used by the War Eagle and Centre Star Le Roi. The Le Roi this last are 30 tons, but the cars supplied by the again proved itself the backbone of the same company to the Iron Mask are of camp, shipping within 40 hors of 1000 and are credited with a tons a day for seven days; mines that smaller size and are credited with a tolls a day for seven days, littles bate capacity of only 20 tons. The cars of can produce 1000 tons a day cannot be capacity of only 20 tons. The cars of can produce 1000 tons a day cannot be the field Mountain road have capacities found everywhere. The work of sinking for 35 and 50 tons respectively. However, the big shaft continues. The station at the larger-sized cars are in greater the 1050-foot level is being out out. It use than the others all the shipments by is 35x30 and 20 feet high from the larger calculated on a basis of 40 Now that the station is completed the that line are calculated on a basis of 40 Now that the station is completed the

that line are calculated on a basis of 40 Now that the station is completed the tons to each car. This figure is the one adopted by a kading official of the rail lands of the past week the Le Roi sent 6,960 tons to the Northport smelter, a gain of 2, are reganization of the company. In this are reganization of the company. In this plan it is contemplated to take in come of the redited with 1,710 and 810 tons, a faller of 90 and 120 tons respectively. Le Roi No. 2 made a gain of 57 tons in total shipments for the week of 1,280 ore three feet wide has been partially developed on the 350-foot level. It is expected by the management that the respected by the management that the respected with 800 tons, an increase of credited with 800 tons, an increase of the station is completed the Northwest will be continued on down to the line with white Bear pending are reorganization of the company. In this are reorganization of the company. In this
