

STILL HOPE TO REACH CHANNEL

Hun Would Then Shell England, Win Peace.

Leading Foe Politician Admits 3,000,000 Lost.

Copenhagen Cable — The Germans still are of the belief that they will be able to reach the English Channel coast, bar navigation of the waters and bombarded Southern England, and that then it will be easy to begin peace negotiations, according to an interview the Politiken has had with a prominent German politician, a member of the Reichstag, who requested that his name be not used. He added that the German offensive thus far had proved a failure owing to heavy losses, and that the German high command was waiting to obtain more artillery. Germany had lost in killed, wounded and made prisoner 3,000,000 men, he added.

Answering questions about the opinion of the Reichstag Main Committee on the situation on the western front and the end of the war, the newspaper's informant said:

"We still believe, according to messages from our military leaders, that we shall reach the north coast, where our guns can bar navigation of the Channel and fire at South England. It is suggested from the German side that with this another course of the war will commence, and as far as Germany is concerned it will be very easy to start armistice negotiations, as, despite all assertions, we do not aim at any conquering. We want neither the mine districts at Lorraine's west frontier or Antwerp.

"We have lost, including killed, wounded and prisoners, 3,000,000 men. Do you think that we intend to make foolish claims and send our children through another four years of war? Moreover, we shall have enough to do during the age of man to control the new Russian countries and secure there mercantile and industrial influence. Responsible German politicians only demand that the western powers shall give back our colonies."

No matter how deep-rooted the corn or wart may be, it must yield to Holway's Corn Cure if used as directed.

Chart for New York Harbor.

A revised chart of New York harbor, on a scale of 1-40,000 has been issued by the United States coast and geodetic survey. The labor involved in bringing such a chart up to date is illustrated by the fact that in one year there have been for this chart 253 different items of change, which required 233 working days to compile and engrave. Marked changes in the contour of the bottom, disclosed by recent surveys, are shown at the entrance between Sandy Hook and Coney Island.

BUILD UP THE BLOOD

You Cannot Have Health if the Blood is Weak and Watery.

It is a hopeless task to try to restore your health while your blood is deficient in quantity or quality. The blood circulates through every portion of the body. It takes nourishment from the food and distributes it to the various organs and muscles; it takes also any medication that is administered through the mouth. The blood is the only means by which medicine can reach the nerves. Hence if the blood is poor the body becomes weak and the nerves shaky, and the victim may be subject to headaches and dizziness, poor appetite, indigestion, a constantly tired feeling or perhaps to rheumatism, sciatica or neuralgia. Poor blood is the forerunner of nearly every ailment to which mankind is subject, and you can only enjoy robust health by keeping the blood rich, red and pure. To keep the blood in this condition no medicine yet discovered can equal Dr. Williams' Pink Pills. Every dose helps to make new, rich blood which carries new health and new strength to every part of the body. When one becomes weak and pale Dr. Williams' Pink Pills restore the blood, bring the glow of health to the cheek, and make weak, ailing people energetic and strong. Mrs. Stephen H. Williams, Kitchener, Ont., says:—"Some years ago my health started to fall. The doctor said my blood was thin and watery, but the medicine I took did not do me any good. My joints and limbs would ache and swell, until it was almost impossible for me to get up and down, and no one knows how much I suffered or how discouraged I was. Reading of Dr. Williams' Pink Pills one day I decided to try them. I got a couple of boxes, and by the time I had taken them felt an improvement. I then got six boxes more and before I had taken them all felt like a new woman in every way. I could do my household work without feeling tired, and in fact I was enjoying better health than I had done for years. You may be sure I will always strongly recommend Dr. Williams' Pink Pills to all other sufferers."

You can get these pills through any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from "The Dr. Williams' Medicine Co., Brockville, Ont."

Why you should look for this Trade-mark on your Shoes

A TRADE-MARK is a manufacturer's signature. If a firm makes an article they are prepared to stand behind—they stamp it with their trade-mark. It is put on their goods so you may identify them. It stands to reason, therefore, that it is safer for the public to always buy "known" and "trade-marked" shoes rather than "anonymous" shoes.

[Each working day of the year, the A. H. M. trade-mark is stamped on the soles of thousands of pairs of shoes for men, women and children, because we want you to know our shoes when you see them—because we are making a sincere effort to produce good values in footwear—because we believe you will find our shoes satisfactory—and buy them again and again.

Ames Holden McCready are Canada's largest makers of shoes. A.H.M. footwear is sold by thousands of dealers in every part of Canada—and by the leading merchants in almost every town.

We make such a large proportion of the boots and shoes that the Canadian people wear that you are probably wearing A. H. M. shoes now. However, the next time you buy shoes, to make sure, look for this trade-mark on the sole.

We make many grades and styles of footwear, but no matter what price you pay for them you will find them excellent value for the money. You will find it profitable and satisfactory in future to always make this trade-mark your guide in buying footwear for yourself and your family.

"Shoemakers to the Nation"

MILK IN THE HOG RATION

In order to raise and finish all the extra pigs that will be farrowed in Canada this year as a result of the campaign for increased production, it will be necessary to exercise the utmost economy in the use of concentrated foods. Pig raisers who have access to dairy by-products have a great advantage over others. Experiments have proven that when meal is worth \$40 a ton, milk is worth more than \$8 for an equal weight, that is, provided it is fed economically. Experiments carried on at the Dominion Experimental Farms and Stations show that for growing hogs, 60 lbs and over, 400 lbs. of skim milk produced results equal to 100 lbs. of mixed meal. Buttermilk fed fresh is equal to skim milk. Whey is not so valuable. One hundred pounds of whey was proved equal to 19.2 lbs. of quantities and before it has soured.

A study of experiments with skim milk show that for young pigs 1 lb. of milk fed with 2 1/2 or 3 lbs. of meal gives best results. For larger hogs less milk may be used. For hogs over 100 lbs. in weight not more than 5 lbs. of skim milk daily should be fed in order to get the greatest value from the milk.

At the Nova Scotia Agricultural College it was shown that the best gains were made by feeding a lot of hog ration composed of 138 lbs. of grain, 900 lbs. of skim milk, and 110 lbs. of mangels. At the Ontario Agricultural College the best results were obtained where the proportion of milk to meal was 2.5 to 1. In one trial in which this proportion was used, 365 lbs. of skim milk was equal to 100 lbs. of meal. This agrees fairly closely with the results obtained at the Ottawa and Branch Farms.

In a series of articles that appear in the May number of The Agricultural Gazette, both the Ottawa and Guelph authorities agree that it does not do to change the diet from sweet to sour

milk. For young pigs the sweet milk is much to be preferred. For young pigs the sweet milk is much to be preferred. For larger pigs it seems to make little difference whether or not it is fed sweet or moderately sour, provided whatever condition favored is uniformly kept up, that is to say, if the milk cannot be obtained always sweet, then it should be fed sour as a rule.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

NOT WORRYING ABOUT MONEY

London Cable.—(Via Reuter's Ottawa agency)—During discussion of the finance bill in the Commons, Bonar Law, Chancellor of the Exchequer, said that the question of raising money in the near future had not caused him serious anxiety. The big loan floated in January of last year realized £1,000,000,000, while the war bonds started last October, and the savings certificates had produced £719,000,000 to April 1st. He was not in the least despondent about getting the required money in this way, despite the recent falling off in subscriptions. He was considering steps for the stimulation of this form of campaign.

The discussion showed that the budget was well received. The Chancellor indicated no change in the schedule.

HUN TROOPS FROM ROUMANIA FRONT

London Cable.—"Reports from Liege say that only cavalry divisions from Roumania have passed through Liege going westward, and that more troops from Roumania are expected on the Belgian front," says a despatch to the Exchange Telegraph from Amsterdam.

"Orders have been given for all other traffic on the railways to stop in order to allow those troops to pass," the correspondent adds.

It is probable that the cavalry referred to by the correspondent belongs to the German forces which were operating in Roumania and have been released from that front through the signing of the peace treaty between Roumania and the Central Powers.

The Oil for the Farmer—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick calves. There should always be a bottle in the house.

30 STRIKE ENDS. Chicago Report.—Approximately eight thousand teamsters and truck drivers reported for work to-day almost to a man, labor leaders said, after going on strike yesterday for an increase of wages. Federal authorities sent for union leaders, following reports that Government war business was being interrupted by the strike, and as a result of the conference the men were ordered back to work.

BURY BENNETT IN PARIS. Paris Cable.—The body of James Gordon Bennett, who died at Beauclieu yesterday, will be brought to Paris early next week, in accordance with Mr. Bennett's desire, often expressed, that Paris be his last resting place. Mr. Bennett's legal representative in Paris is informed that it is not expected the will will be made public until after the funeral services.

As a vermicide there is no preparation that equals Mother Graves' Worm Extirminator. It has saved the lives of countless children.

BIG POTATO CROP.

40,000-Bushel Increase Expected in Ontario.

Toronto Cable.—Thirty-seven carloads of "standard" potatoes, Irish Cobbler and Green Mountain, have been imported from New Brunswick for seed purposes by the Ontario Department of Agriculture. From estimates prepared by the department it is figured that the use of high-grade seed instead of the inferior mixed seed potatoes will mean an increase of about 40,000 bushels in Ontario's potato crop this year. The bulk of this extra crop is being grown in the north, and will be available for distribution as seed next spring in Older Ontario. It was sold to the settlers at \$1.75 a bushel, though the cost to the Government was slightly higher.
