H. HASZARD. Charlotte town, Nov. 1st, 1855.

CHEAP AND SAFE LIGHT!

NEWELL'S PATENT Safety Lamp & Lamp Feeder

Warranted to prevent all accidents from the use of BURNING FLUID, PATENT OIL, ROBIN OIL, CAMPHENE,

And all other explosive compounds used for production of light.

This INVENTION is applied to common Fluid, Solar and Camphene Lamps, Lamp Feeders, Fluid-Holders, Lanterns, &c., &c.

We respectfully invite the attention of the public to NEWELL'S IMPROVED SOLAR FLUID LAMP! which gives a steady, brilliant flame, nearest to Gas that has ever been produced. The cost of burning being only ONE CENT AN HOUR! These Lamps are particularly adapted for Churches, Hotels, Factories, Stores and parlours. Oil Lamps can be altered, using the same shade. Common Fluid Lamps can be changed to Safety Fluid Lamps.

PORTER'S Patent Burning Fluid and Camphene,

As cheap and good as can be bought in the market Also, Shades, Globes, Lamp Wicking, Entry Hall Lanterns, Fluid Chandeliers, &c.

For Sale, Wholesale & Retail, by Newell, Willard & Co., No. 28 Bromfield Street, Boston.

N. B.—A large deduction will be made from the former prices of NEWELL'S SAFETY LAMPS, &c. The following certificates are a sufficient guarantee of the entire safety and efficiency of the Safety Lamp and Feeder.

We have had an opportunity to test the Patent Safety Lamp and Lamp Feeder of Mr. John Newell, of this city, in regard to the measure of protection their construction affords. In the trials to which we subjected them, we endeavored, without effect, to produce explosions of the vapor of the fluid mixed with air, and to burst them by the pressure of the vapor alone. The principle adopted by Mr. Newell is that of the well known Davy Lamp. He has so combined the parts, that we are satisfied that all risk of explosive action is removed.

CHARLES T. JACKSON, M. D., AUG. A. HAYES, M. D., Assayers to the State of Massachusetts.

Boston, Aug. 30, 1852.

Mr. John Newell, of Boston, has exhibited to me a Lamp, and also containing vessels, furnished with wire gauze protectors, upon the principle of Davy's Safety Lamp for miners. He has used both these instruments before me with inflammable fluids, and in both, when set on fire, the flame was arrested by the wire gauze, which is coated with silver. If the instruments are faithfully constructed, and carefully attended to, so that the wire gauze does not suffer injury from corrosion, wear or violence, I am of opinion that the protection will prove effectual against explosion. Nothing short of this conviction would induce me to countenance the continued use of the burning fluids, so called, as I have thought they ought to be entirely discarded, if not prohibited from use; so frequent and dreadful are the accidents occasioned by ignorance and carelessness. In every case, glass lamps should be given up; and those of metal substituted, on account of the danger of fracture.

B. SHILLMAN, senior. New Haven, Oct. 16, 1855.

I have examined Newell's Patent Safety Lamp and Lamp Feeder. They are constructed upon strictly philosophical principles, having a tube of silvered wire gauze, with a small perforation in the cap. If well made, they cannot fail to insure protection against those dangerous explosions to which the vapors of burning fluids and camphene are subject, when mixed with air. Their general introduction, I have no doubt, would prevent many distressing and fatal accidents.

E. S. CARR, M. D., Professor of Chemistry, Albany Medical College, and of Applied Chemistry in the University of Albany.

COALS! COALS! CHALDRON Pit Coal, Just arrived and for Sale by JAMES FURDIE. Charlotte town, Dec. 5.

TO LET with immediate possession, the southeast end of the House recently built on the corner of Great George and Kent Streets, and next to that occupied by Messrs. Gahan & Co.

The cellar is 24 feet by 50, has a substantial wall, is over 7 feet deep and is perfectly dry. There is on the first floor a shop 20 feet in front and 30 feet in depth; also a front Entrance, a Hall in rear of the shop and two other apartments. There are on the second floor one room 24 feet by 15, one 20 feet by 15 and two about 11 feet by 15, and the third floor nearly corresponds with the second. There are three rooms on the fourth floor and a fine view of the Harbour, the River and the Country round, there is also attached to the premises a new Warehouse and is one of the best stands in this City for Mercantile or any other business. Further information may be obtained by applying to THOMAS DAWSON, July 14th, 1855.
