Y. W. C. T. U. Meeting.

The Young Women's Christian Temperance Union held their regular business meeting in the "Y" rooms yesterday afternoon. At the conclusion of the devotional exercises a Bible reading on the text "Cast-

for you," was given by one of the members. The following reports were then presented: General secretary's, Y. W. C. A. evangelistic, press, look-out committee. The general secretary's report gave the total attendance at the rooms for the quarter as 3,454; number to lunch, 934. Meetings were held in the rooms by the McAll Mission, King's Daughters and Sons, Housekeepers' Mission, W. C. A. The Y. W. C. A. report showed the evening attendance for the quarter to have been 1,201. A choral class has been held every Thursday evening, and a sewing class formed for Friday evenings. The literary evenings have been devoted to Tennyson's "Idylls of a King." A very successful reception was given on the evening of Nov. 1. The King's Daughters Circle, in connection with the Y. W. C. A., now numbers 115, and much good work is being accomplished by them. The cooking class committee reported progress. The kitchen garden class has been organized, and the children will be given their first lesson Friday afternoon at 4 o'clock in the "Y" Rooms. The lessons will be continued on on the same day of the week and at the same hour during the season.

The School Heating Question.

The School Heating Quest

and the pupils who attended the school when these furnaces were in use, were just as healthy as those who have attended since the Smead-Dowd & Co. system has been put in. Mr. Jeffery infers that the letter which appeared over our signature was not written by ourselves. In this he is mistaken. No suggestions were offered by anyone. We write the letter, and maintain the position we took therein in every respect. As regards Talbot street school, we write prepared to heat and ventilate it to the entire satisfaction of the school board and engineer at our figures; and if we choose to do a job for less than one-half what some other dealers ask, that is our business. We sign a guarantee bond, and if the work is not satisfactory we are the losers and no one else. What is the object in spending money advertising for tenders if the work is to be given to Mr. Dowd at any figure he chooses to name? There are a large number of responsible firms manufacturing furnaces and heating apparatus in Canada who have heated and ventilated schools and buildings successfully in all parts of the Dominion, but Mr. Jeflery claims that the only firm capable of doing this is Smead-Dowd & Co. With reference to the tenders for Princess avenue school, he states that our tender was the same as the lowest tender put in by the McClary Company, and that they had another tender in for more than double the amount. Had he been looking after the interest of the clizicens (as he is elected to do), he would know that their highest tender was for a complete combination system of warm air and hot water. Mr. Jeffery's statement that we saw the Smith-Anthony furnace at work years ago is correct, but the statement that we interest of the clizicens (as he is elected to do), he would know that their highest tender was for a complete combination system of warm air and hot water. A Great Wheat Crop.

St. Paul, Minn., Nov. 23.—The discovery has just been made that the wheat crop of Minnesota and the Dakotas is many millions of bushels above all estimates. Grain men have been estimating the crop at from \$5,000,000 to 105,000,000 bushels. Those who have put their figures at 100,000,000 have added from 10,000,000 to 20,000,000 more, and those who figured higher than that originally have gone as high as 180,000,000 or more now.
