block ice.
No Landing Places.

Gone 28 Days. It was 28 days ago, on the afternoon of Thursday, May 21, that the Amundsen-Ellsworth aeroplane expedition of two machines hopped off from Kings Bay, Spitzbergen, for its attempted flight to the North Pole.

The venture was everywhere

The venture was every counted one of extreme hazard. With Amundsen, as observer in the second aeroplane, was Lincoln Ellsworth, aviator, engineer and explorer. Amundsen and he were the navigators of the expedition. In addition, the expedition carried four men, two in each of the planes. They were Hjalmar Riiser-Larsen, expert airman; Lief Dietrichsen, an aeroplane nilot; Oskar Omdal, mechanic, and lane in the ice, the first of this size

ner philosophy of life, love and work.

The series marks the first time that a taking in but herself? Fearful must daring explorer, who returned reigning member of royalty has be the hours when she honestly faces written under his or her own signa-her own image in the glass! civilization yesterday after a daring but fruitless attempt to reach the North Pole by aeroplane. He spent many days imprisoned in ice.

lay a return course by a route further east, in order to cross hithereast, in order to cross hitherplanes ice-locked, apparently our greatest difficulty was to get them into the air again. The situation was obviously critical, and with a view to lasting as long as possible, we reduced our daily rations after the reduced our daily rations after the first day to 300 grammes per head. This was less than a pound per day per man, and meant stretching our food supply over twice the period originally planned.

Many Difficulties.

In order to get one plane clear. We have the season for them, when paint, dye, wigs, false teeth, set up a brave but agonizing and often unbrave but agonizing with those whose springtime it is.

Youth will laugh at these efforts, will turn them into ridicule for, being triumphant, youth is cruel. But for all that, we who are ageing can be compared to the paint, dye, wigs, false teeth, set up a brave but agonizing and often unbrave but agonizing and of

In order to get one plane clear, we concentrated our energies on the N25, and for the following 24 days we underwent all sorts of difficulties caused by the vagaries of the fickle Arctic ocean.

The N25 being freed after greatest exertions, we examined the plane. Though showing signs of strain, it was lugged practically undamaged out of the pack ice to a starting place, which we had levelled, some distance away. Our many trials and tribulations in this period of tremendous effort will be told in subse-

quent articles. On the 14th of June, cracks suddenly opened in the ice under our feet, threatening to remove a third of the work which we had done in levelling a starting place along the frozen surface.

In view of this serious possibility, mediately after landing to the N25 became locked between two the N25 became locked between two masses of ice while we were trying at to get our aeroplanes clear. In a short time the whole ice-lane froze tight, gripping the N24 also. Observations during the night disclosed our position as 87 degrees and closed our position as 87 degrees and the smallest possible of the smallest possible and the smallest possible of the fruit which is no smallest possible and the smallest possible and the smallest possible of the fruit which is no small for the fruit which is no small for you, and when you see the prize, the pleasure, passing you by for another, remember that you have had your day and that jealousy can sour even a happy remembrance. After all, enough is as good as a feast.

Do not imagine that I am preaching, but I am on the further downing but I am on the further downing the normal series of the prize. grees and 20 minutes west longitude, quantity of gasoline to proceed south-so that the distance covered in our eight hours' flight was exactly 1,000 successful.

Our course was set for Spitzbergen kilometres, as our average speed was 150 kilometres per hour. This meant that a head wind had put us back average speed was hour. This meant had put us back two soundg-place and found large island forming the land, a large island formin Cape, the northern point of northeast land, a large island forming the northeastern part of Spitzbergen.

Our flight to this port required 8 great big, shiny fruit is dropped into ings at our landing-place and found Moreover, there were no grounds for assuming that ice conditions further north would be such as to permit of a successful landing. A landing at the actual pole, with opportunity for observation, would apparently have been impossible. We believe that merely flying over the pole without making these accurate observations would have been feasible

Continual Observations.

observations would have been feasible under the conditions we observed, al During our return trip we conthough without real significance, and tinued carefully to make similar observations to those which we had made on the way north, but on account of the fog we estimate that we observed not more than 60,000 therefore not worth taking a great we observed not more than 60,000 course kilometres along our return route. Thus, we and book the are We agreed finally that instead of Thus, up and back, the exroute. Individual pedition has made observations on 160,000 square kilometres of hitherto unexplored area. Immediately after our landing at North Cape we sighted our landing at North Cape we signted the Norwegian sealer Sjoeliv from Baatsfjord passing far to the westward. We immediately hopped off and went out to it. We were gladly received on board the ship, and our plane was taken in tow, but toward.

No other type of aeroplane could have withstood the strain which our Dornier-Wals met successfully. Their Dornier-Wals met successfully. Their peculiar construction, unlike any other type, fitted them particularly for our requirements.

The engines always started instantaneously, particularly at times when immediate action was neces save the aeroplane under threat of danger from pack ice.

COUNTY ROADS WIDENED TO PROTECT MOTORISTS

County Engineer Charles Talbot is doing everything possible to safeguard motorists and others using the county roads. County highways are next Friday of the Windsor-Niagara being widened this year, and the grades improved.

Special attention has been paid to the Sarnia gravel road, where county employees have just completed the spreading of 550 cords of gravel.

Interviewed today Mr. Talbot declared that graveling operations were farther advanced than they were this

MEET AGE WITH A SMILE IS DENIED BY ACT

ADVISES QUEEN MARIE Rev. Wm. Beattie, D. D., Is Loath To Comment, Though,

Rev. William Beattle, D.D., C. M. G., First Presbyterian United church, was loath this morning to comment upon the attempt being made by the continuing Presbyterian ghurch to retain the name "the Presbyterian church in Canada."

Answering the question, Dr. Beattie pointed out that the dominion ac incorporating the United church of Canada prohibited the use of the names of any of the three churches formed the union, though the right was not taken away for any nonconcurring minorities to for "a Presbyterian a Methodist or a Con-

Dr. Beattie was much more inclined to talk of the new church and of the sessions of the general council, which closed at Toronto yesterday.

"There was absolute concord,

says: "Old age should be like an alabaster chamber." I like the picture harmony and unanimity," aversed Dr. evokes—all white, clean, peaceful especially see old age as peace Beattie. Something seemed to come over the 350 commissioners of the council at the communion service which obliterated everything that "white peace"—a dying down of all storms and desires, of striving and struggling.

If the life lived has not been wasted, if a normal amount of joy savored of sectionalism, something came over us all which wasted, if a normal amount of joy and pain has been experienced, if difpossible for us to forget almost that we ever had been separated.'
Regarding the use of the old name, ficulties, sorrows, conflict, have been bravely met and overcome, if joys and

Dr. Beattie expresed his entire wilinghealthily enjoyed, old age ought to bring peace, calm, rest. You do not want to keep dancing, dancing when Rowelll, K. C., Toronto, and other distinguished lights. He regret may have a share of his thoughts, but if he is a man who has acquired his full development ian," though not as part of the old normally he will have reversely the share of his print and the share of the old his print and the share of the old his print and the share of his pointenance of the share of the share of his pointenance of the share of has acquired his full development in ormally, he will have replaced his love of dancing by something just as real and satisfactory to him in

There is also something of peace in it, something of relief at the knowledge that what we call pleasure act shall prevent such congregations forming the new church and nothing in this knowledge that what we call pleasure from constituting themselves a Pres is not everything. It was sweet in its byterian, a Methodist or a Congregaday, but has been replaced by sometional church as the case may be, under thing more worth while, though prob-

the respective names so used.'
Harmon Westland, secretary-tre of the Elmwood avenue Presbyterian church and superintendent of the Sunschol, aserted this morning that since remains eternally a grief. Tis grief to herself as well as to never ben incorporated or the name a real grief to nerself as well as to others. A beautiful woman is like a 'Presbyterian' copyrighted, that the continuing Presbyterian church could make what use of the name it desires.
'We can't be stopped from using the disappear. I confess that I find no consolation for the loss. It simply belongs to the sorrows of this world ada. declared Mr. Westland. They can't take that into union with them can't take that into union with them and bury it. Presbyterian means simply a system of church government. have retained the name and we intend anywhere.

ed, when the struggle is being kept to retain it to the end." up and whe none knows that there can be but defeat in the end. Westland maintained that the United church is protesting against the use of the name "Presbyterian" just But old age itself is like an ala-baster chamber—all white, clean, like the bowed head. And the door which as much as to the full name "the Presbyterian church in Canada," though such does not seem to be the case either by the federal bill or by Dr. Beatopens out of it opens out into light.
