POTATOES ROTTING IN THE FIELDS

Circular From O. A. C.

During the last few days we have re-

reived from various districts in the Pro-vince of Ontario samples of diseased young potato vines, with requests for information regarding the nature, cause and cure of the disease. We had just previously noticed the same disease amongst the potato crops both on the experimental grounds and in the general crop of potatoes on the College farm. As the disease appears to be farly wide-spread this season, we have deemed it advisable to issue a circular letter re-

specting it. In the growing crop an affected plant will have a wilted appearance, being dull dirty green in color, the stems flaccid, the leaves will have a tendency to curl. the leaves will have a tendency to curl. The stems near the ground and below will be blackened, and in the various stages of decay from a soft wet spot. On digging out the seed potato, it will be found to be soft and pulpy, and, when broken open, the inside is usually sluny and gives off an offensive odor. This soft rot of potatoes is a bacterial disease. Its development in ground where it has not been before is nearly always due to diseased seed potatoes having been used ior planting. As long

having been used for planting. As long as affected seed potatoes are kept dry, the disease will not spread, but as soon as the soft rot develops as the bacteria which cause it have then a chance to dewhop rapidly. An affected seed potato m which the seed has been checked by drying out will have brown or blackish discolorations which are easily seen on discolorations which are easily seen on cutting. The rot may be present in vari-ous degrees, but as it has dried out it may look like a dry spot. When such affected potatoes are planted the moist conditions in the soil which are neces-sary for growth, are favorable for the further development of the disease. Some of the eyes of the potato will send up, their shoots but these are usually

Spraying of any kind is of no direc use with this disease. The treatment is preventive rather than curative. As pointed out above, the disease develops in 'the first place from affected seed tubers. But when once it is established in a crop it may be spread from the dis-cased crops to neighboring healthy spots by the cultivator, hoe or other implement used greating controminated by coming in by the cultivator, noe or other implemented insed getting contaminated by coming in contact with a rotting plant and then with a healthy plant. Biting insects, such as the potato bug, also spread the disease to some extent, and it is only by spraying for these that spraying is helpful in preventing the spread of the disease

A soldier, serving in the 2nd South Lancashire regiment, "somewhere in France," has forwarded to Mr. B. Mon-aghan, of 34 Wharrington-lane, Wigan, a letter found upon a dead German soldier. Bearing the address, Wehrman Karl Daubler, 27th Reserve Corps, Reserve Infantry, it evidently purports to have Daubler, 27th Reserve Corps, Reserve Infantry, it evidently purports to have been received by the man from his wife and tamily at Heidenheim, and dates back to March 7th. It is couched in pathetic terms, and affords some striking evidence of the food scarcity prevailing in Germany even at that time. Trans-lated into English, it reads as follows:— "Dear Father—Here at last is another

lated into English, it reads as follows :-"Dear Father,—Here at last is another letter from me. How are you getting on? Are you still keeping well? Thank God, we are in good health. Do write and let me know whether you will be able to get home by Easter. We should like so much to have you home now that the fine weather has set in, so that you might come with us to the wood. Otto can run now, but not very well yet. You should

now, but not very well yet. You should be home to see his foot. He can only run on his toes, and mother thinks the foot is getting shorter, but we hope it will soon mend.—Love from Karl, Otto and Wilhelm. "Dear Karl-Lina wants to get work here, but I cannot manage to keep her, as we have not enough to eat ourselves as we have have to be had in Heiden-heim, and if I were to speak for her at Schults she could start at once, but 13 pfennig an hour (about 1¹/₂d.) is so little. What do you think? Of course, she could sleep with us, but, as for board, everything is terribly dear. After Wed-nesday we are to be allowed only 200 gram. of bread per person-hardly ¹/₂ lb. a day—and what's that? To-day I got in two loaves, so that I may have a stock. I still have money, but even then there is nothing to buy. I haven't a potato left and carnot get any in the whole towr. I have also tried to get some in Schnaid-heim, but it was no use. Dear Karl, don't worry about us. I shall get some-thing, never fear. I won't be beat, I There is still work to be had in Heiden-

CANADA. Through twilit forests and o'er fertile plains, By teeming towns and orchards blossoming In all the faery splendor of the

spring, The word of pride goes forth and glory reigns. For through the distant rumor of

the guns, Heard from afar peaceful land, afar throughout the There speaks a voice that bids thee understand The awful fiery ordeal of thy sons.

Swift at the call they gathered to

our aid, The flower of all thy manhood, vow-

ed to fight For Britain and for freedom and the right

Until the last great sacrifice was made. And in that darkest hour, when very

hell Seemed loosed against them, stead-fast yet they stood, As war-worn veterans for hardihood,

And cried thy name triumphant as they fell!

Living and dead, their brave hands garland thee With love and honor, an unfading

crown, goodly heirloom to be handed down

To children's children that are yet to be; And we, who share thy glory and

thy tears, Their splendid service never shall forget, But, to thy noble heart drawn closer

vet, ll stand as one with thee throughout the years. —Touchstone, in London Daily Shall

NEW HEAD OF C.M.A.

President-Elect of Manufacturers Is a New Brunswicker.

James Henry Sherrard, the president-elect of the Canadian Manu-facturers' Association, was born a "blue nose," and up to twenty-five "bite nose," and up to twenty-nee years ago was engaged in measuring and weighing merchandise in a gen-eral store at Shediac, New Bruns-wick. One day he boarded an Inter-colonial train with a ticket for Montreal in his pocket, and the "Commercial Metropolis" has ever size hous him

Bince been his home. Mr. Sherrard's own particular spe cialty is manufacturing mattresses, and there is probably no manufactur-er in Canada who understands the process better. But his manufacturprocess better. But his maintacture ing ramifications are by no means confined to that one particular line of industry, for besides the presi-dency of the Alaska Feather and Down Company, Montreal, he occu-pies a similar office in companies located at Toronto, Winnipeg, Cal-corre Vergeouver and one or two located at Toronto, Winnipeg, Cal-gary, Vancouver and one or two other points, in each of whose fac-tories furniture of some kind is manufactured. He is a man who gives much thought to the different manufacturing enterprises with he is connected. Consequently he is a man of ideas. In the opinion of his business associates he has more ideas to the square inch of kind of thing is inevitable. I suppose, apart from that, we know nothing of the war. Only those out at the front really know what it means. We are managing Temperamentally Mr. Sherrard is the type of man that tends to secure know what it means. We are managing all right. Schorsch was over again, but may be called out any time. May God shield and protect you, and send you home to us soon.—Love from all the children and from Dora." success in business undertakings. His integrity stands high, conse-quently he creates confidence; his quently ne creates connence; his geniality is outstanding, consequent-ly he makes friends; his powers of persuasion are exceptionally strong, consequently he is able to induce Don't strike a man because you think men to fall in with his views. Mere Technicalities Cannot Defea Right In Canada.

It is possible that a good many non-lawyers did not quite appreciate the position of the Court of Appeat in quashing recently the convictio-of Emil Nerlich for conspiracy 'on the ground that the indictment do's not allege a conspiracy to which Arthur Zirzow was a party." Some of these non-lawyers seem inclined to regard this as a technical poin to regard this as a technical poin which it would have been within the inherent power of the court to brush aside. That, however, is very fat from being the view of legal author-ity of high eminence. In fact, the view of such authority generally is that in this country technicalities are extremely rarely suffered to de-feat the ands of justice at the presfeat the ends of justice at the present time, although in days gone by this was very far from being the case.

In a talk with a reporter recently In a talk with a reporter recently Mr. E. F. B. Johnston, K.C., stated the powers of the court to rectify mere technicalities, and distinguis-ed between a mere technical error and an erroneous form of indictment which goes to the root of the whole

which goes to the root of the whole matter: "If at the trial," said Mr. John-ston, "there is any difference or variance between the evidence given and the charge as contained in the indictment, the trial judge may amend the indictment to conform to the evidence, if he is satisfied that the accused has not been misled or prejudiced in his defence or if an prejudiced in his defence or if an indictment is under a wrong act, er contains a defective statement, the

when the matter comes before the Appellate Court the position is somewhat different. The powers of the court are defined by statute. If the statistication is no substantial wrong or miscarriage was occasioned at the trial, the con-viction shall not be set aside, al-though it appears that some evidence was improperly admitted or reject-ed, or that something not according to the law was done at the trial, or

some misdirection given. "The court on appeal may direct a new trial, or may direct the accused to be discharged if an errone-ous sentence has been passed. The Court of Appeal may pass such sentence as ought to have been given, or it may confirm the ruling of the trial court.

"If the indictment does not substantially

Mutual Helpfulness

In all this present divergence of opinion concerning public policy and private duty, do not forget that the thing that most makes for progress and the upbuilding of character and material welfare is the spirit of mutual helpfulness.

Do you know what has kept China where she is today? It is the pre-vailing spirit of "everyone for him-self." In reading a book on Chinese traits the other day, we came across this observation by an author who knows them well : "One other trait of Chinese char-

acter must not be overlooked. The people are selfish and unsocial; living apart in families, and indifferent to the welfare, or the sufferings, of their neighbors. They have few human sympathies.

"They work apart, in their several callings, without partnerships or combinations. They care not to lend a helping hand to others; and value little even their own wretched lives.'

As long as this selfish spirit pre-yails, China will never amount to much as a nation. Those who will not and do not work together for the common good are poor units of humanity, and are lacking in the first rudiments of social advancement.

Too Many Corn Growers Take a Risk With Cheap Seed Corn

Bad germination in seed corn combined with prolonged cold weath-er at time of planting has been the cause of much disappointment this season to ensilage growers. The seed corn growers of south-western Ontario were almost equally disappointed through being unable to find a market for their thoroughly-dried corn of strong vitality. Many samples were taken by seed inspectors and the investigations made indicate clearly that at least 75 per cent. of the cause for, a poor stand can be traced to the ensilage growers buying low priced seed.

Unfortunately high priced seed is not always a guarantee of high quality, but low priced seed is possible only with corn that has had no The special care in curing for seed. farmer who gets \$1.50 per bushel of 70 lbs, on the ear for corn taken out of his corn crib in the spring has more profit than the farmer who receives \$2.50 per bus. of 70 lbs: on the ear for corn that has been kilndried or rack-dried in special corndrying buildings.

If harvested in dry weather and kept in narrow cribs through the winter, the cheap corn may give a fairly satisfactory stand of plants with thick seeding and good soil and weather conditions. But too many

The Truth at Last

A clergyman recently, at the close of his sermon, amounced that in the course of the week he expected to go on a mis-sion to the heathen. One of the parish-ioners exclaimed, "Why, my dear rector, you have never told us one word of this before. It leaves us unprepared. What shall we do?" "Brother," said the min ister, solemnly, I shall not leave town."

Royal Society's New Head. Prof. Alfred Baker, of the depart-ment of mathematics in Toronto University, who has has been elected president of the Royal Society of Canada for the coming year, was born and educated in Toronto, win-ning a gold medal when he secured his B.A. at Toronto University and taking the degree of M.A. in 1878 He taught in different High Schools and in 1875 was appointed mathe-matical tutor in University College, Toronto. He was made professor of mathematics in Toronto University in 1887, a position he still retains. In the same year he was elected by In the same year he was elected by

accused was never tried at all for the crime in question.

"The form of conspiracy has al ways been that the accused "con-spired with A. B. and others," and it is often mentioned that such others are unknown to the Crown; but there must be a conspiracy with some person or persons before an indictment can be laid, as a man can-not conspire with himself. The gencharge of conspiracy without eral eral charge of conspiracy without naming any other person would lead to disastrous consequences. The evidence might disclose a conspir-acy with some person entirely for-eign to the evidence before the mag-istrate or before the grand jury, and the accuracy might be thind for an the accused might be tried for an offence he is alleged to have com-mitted at a different time and place, and with a person of whose existence

he has no notice. "Such is the law, and no court can exercise any inherent jurisdic-tion, but must be governed by the provisions contained in the criminal code. The well-known rule is applicable, namely: "That a man must be convicted according to law," whether statutory or common law. Any indictment which does not on its face disclose a crime against the law, is not a mere technical objec-tion."

Dialect.

Miss Ritta-Aren't you fond of di-alect poetry, Mr. Drestbeeph? Mr. Drestbeeph (of the Chicago Browning society)-Well, James Whitcomb Riley and Eugene Field do very well, but I came across some poems by a fellow named Chaucer the other day, and he carries it too far.-Life.

farmers have learned to their sorrow the very serious risk they take in using corn wintered in this way. is always advisable for growers to procure seed corn on the ear as during moist weather shelled corn in transportation or storage will absorb moisture and mold with a very few days, thus destroying its vitality .--Seed Branch, Ottawa.

Too Rich To Work

It may be an old yarn, but it was new to us. A Southern teanster had a break-down about half a mile from the black-smth's shop. A wheel was broken. Mounting one of the horses and leading the other, he made his way to the shop, and found the blacksmith sitting on a block in the sunshine, whittling. He told his story and suggested that the tradesman might get his tools and ride black with him to the wreck. The blacksmith called to his wife : "Cinthy ! How much money have yo' in de house ?" She replied : "Fifty cen's an' some bacon." Then with a peaceful smile the It may be an old yarn, but it was new She replied: "'Fifty cen's an' some bacon." Then with a peaceful smile the blacksmith said to the teamster: "No, sah, I reckon I don' have to work today."
