**Make Your Own Spray**

Home Boiled Lime Sulphur is being used in increasing quantities by leading fruit growers and fruit growers' associations. They find that by making their own spray they can effect a considerable money saving, and at the same time produce a preparation that will do the work thoroughly.

It is an easy matter to make home boiled lime sulphur. The chief essential is a proper spray cooker. We manufacture two kinds of cookers, one with a single tank, and one with a double tank. (See illustration.) They are designed especially for this purpose, and will give the greatest efficiency with the greatest saving of fuel. They can be used for either wood or soft coal.

The tanks are made of heavily galvanized steel, thoroughly rivetted and soldered. Will not leak. They are built to give satisfaction, and are guaranteed. Made in five sizes, capacity 30 to 75 gals. Prices and full particulars on application. Get your outfit now. Write us to-day.

IRON AGE

They are built up in units so that you can buy what you need now and add to the outfit later if necessary. All have the best pumps in use on any sprayers—least slippage among eight of the best in a disinterested test. Solutions touch only brass or galvanized parts. Hemp packing, bronze ball valves, both easy to get at. Pumps outside. Power Sprayers are 50, 100, 150, or 250 gallons capacity. 200 pounds pressure with 6 or 8 nozzles.

Ask your local dealer about this line and write us for our new "Spray" book, spray information and copy of Iron Age Farm and Garden News.

The Right Kind of Sprayer

Means the one that just fits your purpose. You need to consider capacity, pump, engine, pressure, mixing, straining sediment, stability on hillsides, using your own wagon, engine or sprayer with balance of the outfit to fit what you already have. Get the right sprayer for YOUR work and you won't have any cause to be dissatisfied. We show here but three of the 70

He referred to an orchard at Havelock, where five barrels to the tree were averaged. Such orchards, where special attention to the standards was paid, were valuable to the province.

WORK RECOGNIZED

Mr. W. T. Macoun, Dominion Horticulturist, spoke on the extension of the work in connection with the Experimental Farms. There are sixteen of these farms, and several more in prospect, entailing an expenditure of eight hundred thousand dollars each year. In Mr. Macoun's department there are now four assistants who are specialists in their lines of work. These include pomology, plant breeding, ornamental gardening, and vegetable growing. In plant breeding there is a wide field in the originating of new varieties hardy enough for the latitude of Ottawa, and at the same time equal to McIntosh Red and other standard sorts. Recognition has been given by the American Pomological Society to the work already done in originating varieties. Mr. Macoun had just returned from Washington, where he exhibited one hundred and forty varieties, all of Canadian origin. For these he had been awarded a silver medal by the Pomological Society, an honor given only in cases of exceptional merit.

COOPERATION ADVOCATED

A paper on what cooperation had done for fruit growers in Nova Scotia was read by Mr. M. B. Davis, who has recently been

EGGS
