Toronto, October 21st, 1909.

In metals and hardware warehouses business has increased in volume. The demand for steel and iron is strong, and prices are firm all over the list. Such heavy merchandise as iron pipe, boiler tubes, black sheets, and galvanized iron are now in seasonal request by country manufacturers. We have not made many alterations of price, only nails and spikes, galvanized sheets and a few other items. An advance in iron pipe was noted last week; it is far from improbable that a further advance will come, so that the present is a rather inviting time to buy such goods.

United States advices show great activity in demand for railway rails, which cannot be overtaken for months because steel mills are behind in their orders. "The billet, bar, plate and shape mills have failed to keep pace with the finishing plants. * * * The capacity of the country, apparently, has broken down in the middle (October 17th), for pig-iron and coke are still to be had, while billets and steel bars cannot be bought, even at a premium, for prompt delivery."

The following are wholesale prices for Toronto, where not otherwise explained, although for broken quantities higher prices are quoted:—

Antimony.—Demand active and price higher at \$9.25 per 100 lbs.

Axes.—Standard makes, double bitted, \$8 to \$10; single bitted, per dozen, \$7 to \$9.
