

D. H. Jones,

Our College artist. The last of a series of illustrious men well-known in College circles.

The cuckoo clock proclaims the knell  
of parting day,  
And "Mother" goes, astute and  
thoughtful, she,  
Then "Father" upstairs plods his  
weary way,  
And leaves the girl to darkness and  
to me."

Why is a Chinaman the greatest  
curiosity in the world?

Because he has a head and tail on  
the same end.

Minister (on Sunday)—"My boy,  
what are you fishing for."

Boy—"Fer fish, of course. What  
yuh think; elephants?"

Judge Baldie—"Some great man  
says that music hath charms to  
soothe even the wildest beast."

She—"Shall I play for you?"

"Evolution is an integration of  
matter and concomitant dissipation  
of motion; during which the matter  
passes from an indefinite, incoherent  
homogeneity to a definite coherent  
heterogeneity; and during which the  
retained motion undergoes a parallel  
transformation."

We always thought that, but Spen-  
cer got ahead of us in expressing it.
