

continued to appear until checked by the cold following that date ; comparatively few specimens were obtained until after August 15th.

I have followed Mr. Grote's Check List closely in the following list of Noctuidæ taken. In the majority of cases these were taken at sugar, the main exceptions being *Cucullias* and *Plusias*.

In this connection I desire to express my obligations to Mr. Lintner and Prof. Grote, who have aided me much.

Squirrels and mice were troublesome at times about the trees, and later in the season timber wolves and some other representatives of the best suburban society, names unknown, were attracted, perhaps more by the operators than the sugar, but at any rate requiring more attention than was compatible with the successful pursuit of Entomology.
