

by the stomach. During the first four days rectal alimentation was employed. A nutritive enema, consisting of four ounces of peptonized milk and two drams of pepto-mangan (Gude), was given every six hours. Small amounts of peptonoids with creosote on ice were given by the stomach. Egg albumin was taken in all the water she drank. After four days, the stomach was tested with small amounts of milk and pepto-mangan (Gude. Beginning with four ounces of milk and one dram of pepto-mangan (Gude) every four hours, the amounts of each were rapidly increased, until after three days the patient was taking eight ounces of milk every two hours and four drams of pepto-mangan (Gude) three times a day. This diet, plus three raw eggs a day, together with the above treatment, was all that was employed for six weeks. The blood examination at this time showed a highly gratifying condition—the red cells being present to the extent of 4,100,000 per c. m. The bloom of youth once more tinted the cheek, and the shrine of St. Vitas lost a visitor.

A SPLENDID MEDICINAL AGENT.

The value of the ozoniferous oils, essences and ethers in the antiseptic treatment of disease, has been largely recognized and demonstrated through the extensive and successful employment of Listerine in surgery and in general medicine. Listerine is the trade name or descriptive word for the most successful formula of modern pharmacy, consequently it has been utilized most extensively by medical practitioners, and "improved upon" by nearly every manufacturing pharmacist and in many retail drug establishments to an extent that does not apply to any other galenical preparation within or without the pharmacopeia. This tribute to the originality and value of Listerine is very flattering to its manufacturers, who continue to enjoy an uninterrupted increase in the output of their laboratories and a constantly widening market, so that Listerine is known and procurable in any reputable pharmacy anywhere. It advertises itself by its own good qualities; indeed the manufacturers have long ago decided that the best advertisement of Listerine is Listerine. *The Western Druggist, October, 1904.*

ANTIPHLOGISTINE & POULTICES.

A prominent physician in lecturing recently on a case of senile pneumonia at the Philadelphia Hospital, said:—

"Hot flaxseed poultices, well made so as to retain their heat for four hours, were kept about the thorax during the day and at night were replaced by a lamb's-wool jacket, for the better part of a week. It is im-
