Financial.

A retrospective glance at the financial affairs of the Dominion for the past alx months will be sufficient to convince any honest mind that A retrospective giance at the minator analyse of the Dominion for the past six months will be sufficient to convince any honest mind that the number of failures among business men in Canada thas been steadily decreasing, as compared with the previous six months. The official Gazette has recorded a much smaller number of these unfortunate occurrences in Canada each succeeding week for the past two months or more, three months, at least; the test issue showed that there had been only four new insolvencies in Quebec province, which number is the smallest for many months past. True, in our own city there have used a couple of more failures during the past week, and it is not unlikely that we may have to record still a few more suspensions in this and perhaps other large cities in Canada of wholesale houses which have been hampered by the depression in trade and burdens of years past; but these are not to be taken as a criteriou for the outlook, the only wonder is that they did not happen long ago. Judging from the state of the country as a whole, from the present experience and bright prospects of future trade we think there are unmistakable sig is of resurgam, if we may be allowed to use the term. Nor are we alone in this opinion; as latimated in our last review, wholesale merchants in nearly all lines of trade report a much more satisfactory movement in remittances from country dealers this summer, and there is certainly some evidence of a revival of confidence among business men. This is admitted by some of the Reform organs of the country, hence their scarcely any longer room for donot on the subject.

Sterling exchange in New York is still quoted at \$4.50, for 60-day bills, and \$1.53 for demand drafts. Documentary and produce bills are discounted at \$5 to \$5 prem.

The local money market continues easy, and the demand for accommodation light the rates for discounting mercantile paper and for stock loans are steady and unchanged. Sterling exchange rules quiet at 91 to 91 premium for 60 day-bills between banks, and 98 to 91 premium cash over the counter. Currency drafts on New York are dull, at par.

The London Times' financial article says that the condition of the money market is one of congestion, produced by prolonged distrust. As yet there is no appearance of a revival of confidence. The market is a prey to rumors, each of which tends to restrict the ranges of business. Money commands no price commensurate with the risks which the lenders must take.

-The report of the Royal Standard Loan company, of London, Ont., shows the receipts for the year just ended to be \$177,273; and liabilities, \$90,026. Out of 14 directors elected, Mr. Charles Stead was chosen as president, and Messrs. W. H. Ferguson and R. Brummitt as vice-presidents.

-A cable from London to the Mail, dated July 8, says :- Messrs. Baring & Bros. invite tenders for the new Canadian government loan of £3,000,000 bearing 4 per cent interest at a minimum of 95, redeemable in 29 years. One half of 1 per cent is to be placed in the sinking fund. Subscriptions will close on the 15th instant.

The meeting of the Canadian bank of Comsatisfactory in every respect to all concerned. The bank, besides earning its 8 per cent dividend, has been able to add more than \$50,000 to its profit and loss account, which is now represented by \$133,231. There are also \$75,000 still standing to the credit of "ContingentFund,"part of the amount appropriated for possible losses, and has a rest of \$1,400,-000, or equal to 23 per cent.

-The young and respected dry goods firm of Messrs. F. & G. Cushing, of St. Helen street, this city, have been compelled to suspend business for the present, a writ of attachment having been issued against the firm by Messrs. J. G. Mackenzie & Co, this city. The firm have always borne a high reputation for a thorough practical knowledge of their business, and scrupulous attention to all its details, but it appears that the losses consequent upon the prolonged commercial de-pression which they have sustained were more than they could bear successfully. No esti-mate of the liabilities has yet been made known, but a statement is being prepared, and fuller particulars will appear in our last edition. It is stated that the firm have no accommodation paper. Messrs. Taylor & Simpson are the assignees.

-Nineteen cars of cheese were shipped Friday from Belleville for England.

-A great revolution in the sugar trade is expected, from the discovery that this luscious article can be made from maize and sorghum, and sold for 2c or 4c per pound. The United States now imports \$100,000,000 of sugar annually, so the new discovery is a matter of considerable importance.

-The arrivals of sea-going vessels at this port since the opening of navigation up to date number 200, and the departures 167, leaving 33 vessels now in port. For the corresponding period last year the arrivals were 193, and the departures 166, leaving 27 in port. -The export of deals from St. John for the six months ending June 30 amounted to \$81,433,-502 superficial feet, against 78,137,301 feet in the same period last year. During the first half of this year we exported 6,417 tons birch timber, and 2.616 tons pine, against 4,050 tons birch and 1,924 tons pine in 1878. The vessels engaged in the trade numbered 119 of 95,790 tons, compared with 138 of 88,963 tons

The Globe's annual crop report appeared on hursday last with intelligence from over three hundred places in Outsrio chiefly, but also from some localities in Quebec and a few in the Maritime Provinces. The fall wheat in Ontario this year appears to be considerably above the average of recent years both in quantity and quality. Spring wheat is below the average in both. Other spring crops are good. Hay variable, but on the average good and abundant. On the whole, the prospects have seldom appeared better, and if we have two or three weeks of fine weather there will be a very fine harvest.

The American and Canadian Food Supply.

The arrivals at Liverpool from the United States and Canada for the week ending June 29th of live stock were again very large, particularly as regards sheep, the number of which was greater than for many weeks past. The steamers were the Massachusetts, with 398 cattle and 1,669 sheep; the Bavarian, with 100 cattle and 1,828 sheep; the Prussian, with 20 cattle and 600 sheep; the Linhope, with 100 cattle and 730 sheep; the Quebec, with 328 cattle; the Lake Champlain, with 289 cattle; and the Queen, with 120 cattle, being 1,630 cattle and 4,827 sheep. plies and increased demand at advanced prices in England.

BOOTS AND SHOES—Manufacturers report business good; orders for fall lines are coming forward ireely, but country merchants do not at this early date seem inclined to purchase their full fall stocks, and therefore the travellers will likely make a second trip over much of their ground. It is more than probable, however, that all the goods manufactured will be required later on. The reduction of the stocks produced by reason of the many failures in the trade has not yet been felt much by dealers. Prices are fairly maintained at the figures fixed for fall goods several weeks ago, and no advance seems probable. There is a slight improvement reported in remittances.

DRY GOODS—Who'esale dealers have been

ported in remittances

DRY GOODS—Who'esale dealers have been receiving their fall importations, and travellers who are out with samples of general fall goods, have in some in-tances forwarded large orders for this time of year. Mall orders from regular customers continue to arrive, some improvement in remittances has also been reported. Travellers report country merchants as being cheerful over the prospects for a good fall trade, which were never better, it is said.

which were never better, it is said.

DRUGS AND CHEMICALS.—Business is generally quiet; the demand is only moderate for all kinds, as is usual at this season of the year. The action of the United States congress in passing the bill to remove the duty of 24 p.c. formerly imposed on quintne, has had the effect of raising that article 2s &d. an ounce, as the few quintne manufacturers who fought the bill for years have shut down their factories, and all orders have had to be sent to Europe. It is feared that before six months have passed prices will be higher than for five years past. Prices quoted here are at present \$4 to 4.10, and in Germany and France they have advanced 11s. 6d. to 14s Bicarbonate soda, ex-whari, has sold recently at \$2.75 per keg of 112 lbs. In heavy chemicals there is but little doing. Remittances are fair and decidedly better than last year at this time.

FLOUR.—Receipts by rail and canal for the week ending July 12th inst., 11,637 bris, against 20,519 bris for the like period of last year. The market has been fairly active, and early in the week, under the induence of a rise in the English markets and small offerings here, values have advanced about 50c on those quoted at this time last week. GROCERIES.—There has been a fairly active jobbing demand during the week, more especially from the west. Raw sugars have been selling freely, at firmer prices, and there is still a strong upward tendency. The refineries are in full blast night and day, and are still unable to supply the demand for grades below 7½c; within the next 30 days an advance of ic to je per lo is expected. An increased demand is reported for Japan teas at prices ranging from 25c to 37½c. The price of second crop teas in Yokohuma snows an advance of fully 5c per lb; although there is a difference of at least 5c in quality, the second crop have realized the same price as first crop. Young Hysons have sold freely at 25c to 3c, and there is an increased demand for low grades, which are scarce. Congons are also enquired for at from 25c to 2c. Other articles are quiet and steady at unchanged prices.

LEATHER.—Trade rules steady, under a moderately active demand, and prices for sole leather, especially No. 1, indicate an upward turn; No. 1 is firm at 22c to 23c. Harness is worth 22c to 23c. There is an improved demand for upper and splits, and the latter are very scarce. Remittances have improved. Hides are firm at 6c. 7c and 8c for Nos 3, 2 and 1. Theepskins are still selling at 23c for clips, and lambskins at 40c.

THE FARMERS' MARKETS. Bonsecours and St. Ann's Markets-Prices at Farmers' Waggons, etc. Tuesday, July 15.

There was a large attendance of market gardeners and other traders at these markets his morning, but the number of waggons on the market squares was not so large as usual, as the majority of the farmers in the surrounding country are busy making hay while the sun shines, consequently the supply of grain offering was small. Oats were scarce and prices firmer, ranging from 75c to 85c per bag. There were no other kinds of grain offering to any extent, and prices remain nominally unchanged. A few lots of old Goderich potatoes sold at 75c to 80c per bag; new potatoes sold at 70c to 80c per bush. in baskets; French string beans at 75c per bush, in baskets; cabbages at 40c to 75c per dezen as to quality; cucumbers at 50c per dozen for good ones, and cauliflowers were worth \$1 50 per dozen. Fresh butter prints were selling at 13c to 18c per lb., and tubs of Eastern Townships at 12c to 14c as to quality. New-laid eggs were offering at 16c, and some inferior lots at 12c. Spring fowls were worth 25c to 50c per pair, as to size, etc.

Fresh fruit was abundant; raspberries, blueberries and cherries, from outside the suburbs, were brought in, in large quantities; the raspberries and cherries sold at \$1 per bucket of 3 gals; and the blueberries at 90c to \$1.20 per box. The second consignment of California bartlett pears and plums was received at Bonsecours market to-day; the pears sold at \$6.50 per box, and plums at \$5 do. Florida water meions of unusually large size, move off slowly at \$1.50 each. Cincinnati harvest apples are now scarce, and worth \$2.50 to 3.00 per brl; gooseberries still quoted at 50c per

Importation of Cattle Into the United States.

A Washington despatch says:—"The collectors of customs at border ports have been notified by the government that the importation of neat cattle from England is absolutely prohibited by law. It is stated that neat cattle have been imported into Canada from England and thence shipped to the United States. Collectors are therefore instructed not to admit any neat cattle from Canada unless it is shown that they were not imported directly or inderectly from England and that if imported from England they did not arrive in Canada within ninety days prior to their arrival at any port of entry. In prior to their arrival at any port of entry. In no case shall the cattle be admitted if there is any reason to believe they are affected with in-fections disease."

Petroleum Market.

The market keeps gaining strength. Transactions during the week have been made on speculation account—55 to 60 cents in tanks per P. C. O certificates. Sales for actual delivery have taken place at 60 to 63 cents. We understand that a good deal of refined has been sold ahead by Petrolia and London refiners at from 8 to 9 cents a wine gallon, London freights allowed, delivery according to price, the earlier deliveries being the cheaper. This is all right if the sellers are covered with crude, if not we think the policy wou d stand re-consideration. The firm tone of the crude market now should be indication enough that no refiner can sell much ahead safely. When the actual handling for the season begins prices will approximate a little nearer cost of producing than now .- Petroia Advertiser.

Montreal Horse Market. SATURDAY, July 12.

The volume of business done in horse, flesh in this market is stead ly declining. The demand continues good, but the supply of good, large driving horses is small, and not nearly sufficient to meet the demand. For-merly, in the early part of the season, buyers The receipts of live stock at Point St.

Montreal Hay Market.

Tuesday, July 15.

The weekly receipts of hay and straw at the market on College street continue to gradually decrease, as the season for the marketing of the new crop approaches. During the past week the arrivals comprised about 250 loads, which were sold at about former prices, which, however, are easy and rather weak, viz, \$7 to \$9 per 100 bundles hay, and \$4 to \$5 50 per 100 bundles straw.

Montreal Fuel Market.

WEDNESDAY, July 9.

There continues a fair local demand for hard coal in this market at about last week's quotations, and all our large dealers report business fully as good if not better than at this time last year. Up till to-day the receipts of anthracite coal from Oswego and via the Whitehall canal at this port during this present week have been about 5,000 tons but the weekly arrivals now are comparatively small. Cargoes of egg and chestuut coal are reported to have been sold in this market during the past week at \$5.00 and \$5.30 per gross ton respectively. Cargoes of Scotch steam coal have been sold, to arrive, at \$3 90. and Pictou steam is now under offer at \$3.70 to \$3.75. Cargoes of Sydney steam coal are reported to be offering at \$3 to 3.75. Liverpool Provision Market.

CHEER.—The market has further declined this week about 2s to 2s 6d per cwt, wolders now offering finest colored at 33s to 35s, and white at 3is to 35s. The demand is scarcely yet equal to present supply; yet we see signs of steadiness to the market, being more disposition on the part of buyers to take hold of fine keeping qualities; and as we learn that the increased American shipments are now equal to the receipus—preventing any further accumulation in New York—we do not anticipate, after next week, much (if any) further decline on June makes, though it is impossible to say what may be the result of the usual pressure to sell July makes when they begin to arrive. Total shipments from America and Canada for week ending to-day, about 110,000 boxes. Old cheese are very difficult to sell at any price, holders asking 1% to 25s, seconding to quality. BUTTER.—The demand is very trifling and quotations are quite nominal—no re-genable offer being refused for new American and Canadian, for which holders ask 60s to 70s per cwt.

A Connudrum Propounded.

Why will the "small boy" persist in eating green apples? The reader may as well give it up at once, since our original parents were guilty of the "little indiscretion." Physicians say, the season in which early or unripe fruit is first introdured, is the one they are the most severly taxed in case of colic, diarrhoea, dysentery, &c. Young and old are guilty, but boys and girls are the surest victims and the greatest sufferers. There is no peace, comfort or safety in the family unless its head provides a proper and efficient remedy. Sects & Bowne's Palatable Caster oil is a certain remedy and is easy to take. Price 25 cents.
