

—THE—
Calorific
Furnace
 STANDS
VICTORIOUS
 OVER THE
Heating Problem

It is the embodiment of the most scientific and economical points in furnace construction. ∴ ∴ ∴

Sectional Diagram, showing Interior of Combustion Chamber, Position of Hot Air Columns and Direction of Fire Travel. Record Calorific Warm Air Heat Producer.

The above cut shows the *Direct* and *Indirect* attachment applied from *Back* of Radiator; also *Course* of *Fire Travel* around air heating columns to smoke pipe.

Architects:

Inform yourselves on all other warm air systems, and then compare with the CALORIFIC.
