PHOTOGRAPHY ART:

ITS RISE AND PROGRESS AMONG
THE ARTS IN THE LAST
HALF CENTURY.

What Montreal offers in the Art Studio of

J. G. PARKS,

195 St. James Street.

The above business fills a wider field known to the artistic world than the mass of humanity who avail themselves of its workings could possibly dream of in their philosophy. It is due to the grandest combination of the sciences, as well as to the steady study of the operator, which places the life-like representative of its object upon the card-board. The constant study of the Photographer divulges new methods to the profession, and the improvements in this branch of industry have been as fully marked as in any field known to man's ingenuity.

The history of the photographic art, from the standpoint of the best European artists, differs materially from our country, as many celebrities in the profession make a specialty of one style, and upon no condition or price would they change their working plans. "Solomon," of Paris, produced his figures in three-quarters length, and has by careful study and great care, placed himself in the van of all competitors. In this country the artist is required to produce all sizes and styles. The studio of J. G. PARKS is up in all the appointments for first-class work in the many departments which represent this industry, as any similar institution in the country.

In the matter of Crayon, Water-colour and India-ink work, and new and elaborate styles of Photographs which have been recently introduced to the notice of our public are presented, and in many instances originated with this enterprising house, and nothing but the highest order of work is allowed to leave the house. His photographic work and paintings in three-fourths and life-size cannot be excelled for brilliancy of expression and harmony of effect. Several fine specimens are on exhibition at his Gallery, representing local and provincial celebrities.

The work in all its varied branches, as it leaves the hand of Mr. PARKS, strictly bears the stamp of the highest finish reached by any artist photographer in the country.

Another distinctive feature with Mr. PARKS is the publishing of Stereoscopic Views. He has in stock 1,300 Views of Montreal, Quebec, Lake George, Ottawa, California, Niagara and Toronto.

This gentleman ranks ahead of any of his competitors in this branch of the art, and the greatest triumphs can be seen in this direction by visiting his gallery. In mentioning the leading commercial interests of our city, we cannot fail to call attention to this gentleman, who so perfectly represents this industry, and who has done so much to give Montreal one of the finest establishments in the city.

The business was established 14 years ago. The interior finish is a combination of modern art and ingenuity, whereby the best and most scientific results are obtained.
