

CORBIN DISK HARROWS

Well balanced and perfectly flexible.

Fits the highest ridge and lowest furrow.

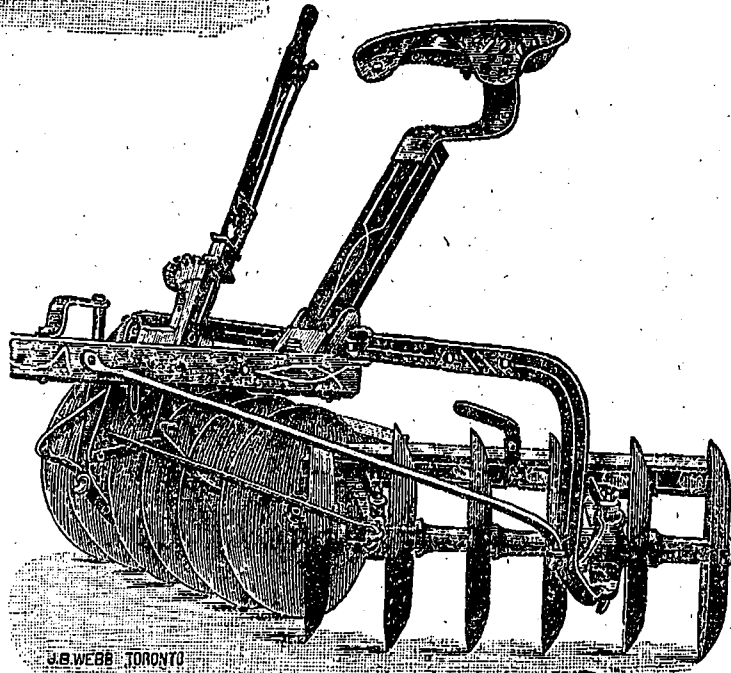

Has ball bearings and chilled boxes, and runs very light.

EITHER REVERSIBLE OR NON-REVERSIBLE.

The Non-Reversible throw the soil inwards, and do not leave a strip untouched, as do many others.

The Reversible is a "throw out" Harrow, but can be set to "throw in" if desired.

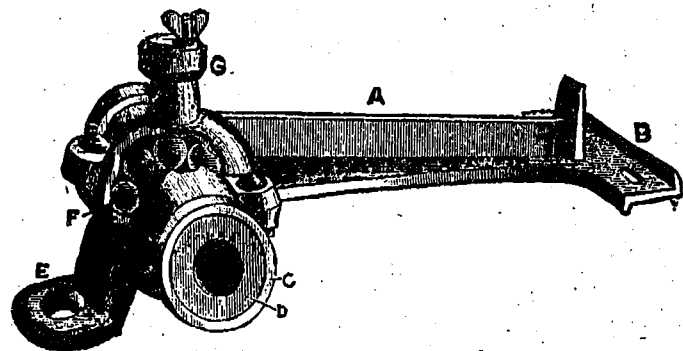

MADE IN TWO SIZES,
6 FEET & 7 FEET WIDE

All are fitted with Steel Scrapers and Clod Catchers.

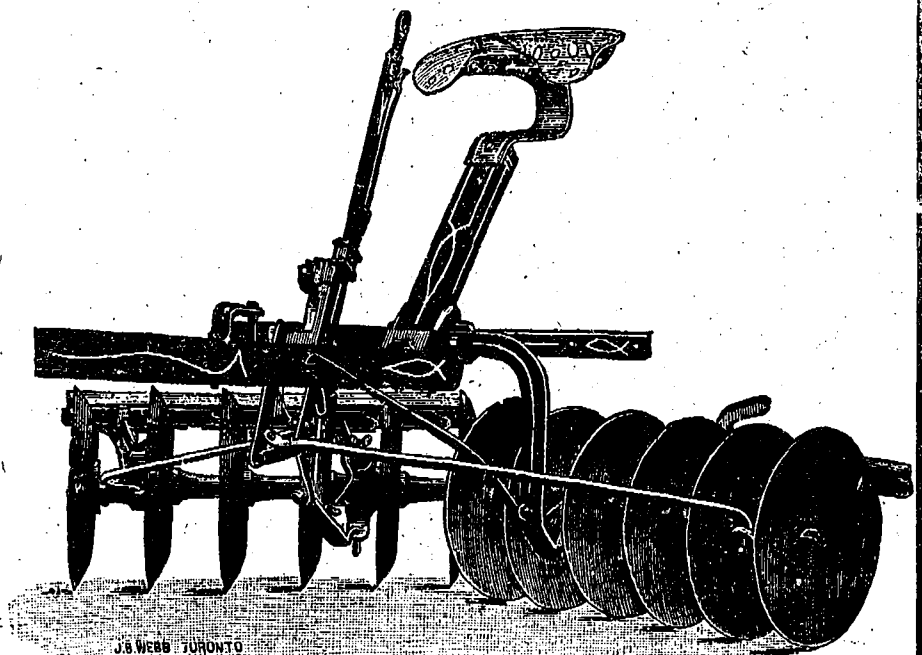

Easy-Riding Steel Spring Seat of new design.

Tempered Disks.

SOLID STEEL "BACK-BONE" in one single piece of Steel keeps the Gangs stiffly in place.

The Disks are tempered and have very hard cutting edges, not liable to break or to wear easily.

MANUFACTURED ONLY BY **MASSEY-HARRIS CO. LTD. TORONTO, CANADA.**
