

## Does Your Hat Suit Your Face?

It is not enough that your new hat is smart, when it is  
worn, and suits the face. It must be all things and more.

It must suit the head, as the great artist would not let  
his quality-will and distinction to his people.

That is the kind of millinery work we do here, and that is  
why we have made this our career wherever we have gone. If  
you've ever had millinery troubles, have your next order put down  
every and your troubles are at an end. Millinery of distinction  
costs less, less than ordinary millinery elsewhere.
