

S.O. 43

DISARMAMENT

SUGGESTION PRIME MINISTER SPONSOR MEETING OF
AMERICAN AND RUSSIAN LEADERS

Mr. Bill Yurko (Edmonton East): Madam Speaker, this country's two neighbours are the most powerful nations of all time, armed to the teeth with destructive potential. Canada is effectively the physical fulcrum between these two balances of terror. Both countries now have relatively new leaders, who are, hopefully, men of peace. Very recently the new Chancellor of Germany called for an immediate summit meeting. Our Prime Minister (Mr. Trudeau), one of the most senior of world leaders, has remained silent on a summit meeting. Therefore, Madam Speaker, I move, seconded by the Hon. Member for Hamilton Mountain (Mr. Deans):

That the Prime Minister, with the unanimous consent and urging of this Assembly, invite both President Reagan of the U.S.A. and Chairman Andropov of the U.S.S.R. for a face-to-face summit meeting on Canadian soil to strengthen nuclear detente, and initiate the process for nuclear arms stabilization and eventual reduction. I would suggest that the meeting place be Edmonton where, several years ago, Premier Kosygin held out the hand of friendship and smoked a peace pipe.

Madam Speaker: Is there unanimous consent for this motion?

Some Hon. Members: Agreed.

Some Hon. Members: No.

INDUSTRY

RECEPTION HOSTED BY CANADIAN WINE INSTITUTE

Mr. Joe Reid (St. Catharines): Madam Speaker, the Canadian wine industry is one of Canada's few growing industries. Quality wines to suit a wide range of tastes have been developed. International recognition and awards are being won by many of our wineries. Their problem is winning recognition at home. I therefore move, seconded by the Hon. Member for Erie (Mr. Fretz):

That all Members support the Canadian wine industry by attending the reception hosted by the Canadian Wine Institute tonight and that all Crown corporations and Departments of Government take advantage of the many opportunities afforded them to promote and encourage the use of this fine quality Canadian product.

Madam Speaker: Is there unanimous consent for this motion?

Some Hon. Members: Agreed.

Some Hon. Members: No.

CANADA POST CORPORATION

STUDY OF PRINCE EDWARD ISLAND SATURDAY MAIL SERVICE

Mr. Mel Gass (Malpeque): Madam Speaker, Canada Post is currently undertaking a study to determine whether unique circumstances prevail in Prince Edward Island which would warrant the continuation of Saturday mail delivery. The people of Prince Edward Island would like the opportunity to assist with this study. Therefore I move, seconded by the Hon. Member for Fundy-Royal (Mr. Corbett):

That the Minister responsible for Canada Post Corporation instruct the President of the Corporation to conduct public hearings in Prince Edward Island in order to obtain direct input from the people on this crucial issue.

Madam Speaker: Is there unanimous consent for this motion?

Some Hon. Members: Agreed.

Some Hon. Members: No.

FISHERIES

DELAY IN RELEASE OF KIRBY TASK FORCE REPORT

Mr. Ted Miller (Nanaimo-Alberni): Madam Speaker, I rise under the provisions of Standing Order 43. The Minister of Fisheries and Oceans has told fishermen in P.E.I. that the Report of the Kirby Task Force will not be made public until January. This decision to sit on the Report for two more months ignores the mandate given to Kirby, which was to proceed on an emergency basis, and the right of Parliament to deal with problems facing tens of thousands of Canadian families. I move, seconded by the Hon. Member for Vancouver East (Mrs. Mitchell):

● (1410)

That this House instruct the Government to release immediately the now completed Report of the Kirby Task Force and all its related studies, reports and background papers, and that the Standing Committee on Fisheries and Forestry be advised that until these materials are made public it should not vote the \$1,047,000 earmarked for the Task Force.

Madam Speaker: Is there unanimous consent for this motion?

Some Hon. Members: Agreed.

Some Hon. Members: No.

ENERGY CONSERVATION

SUPPORT FOR CANADIAN HOME INSULATION PROGRAM

Mr. Mark Rose (Mission-Port Moody): Madam Speaker, I rise under the provisions of Standing Order 43. Earlier this week the Ministry of State for Science and Technology released a report on conservation technologies. It was pointed
