MCGILL UNIVERSITY.  
DEPARTMENT OF CHEMISTRY

MONTREAL, October 18th, 1926.

Sir Arthur Currie,  
Principal,  
McGill University.

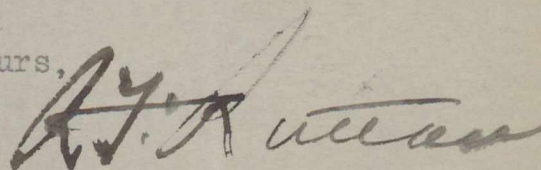

Dear Sir Arthur:

I am enclosing you letter which I received from J.P. McMurrich regarding the Biological Board. I put in my resignation at the end of the session. My resignation from the Executive and from the Board has not yet been accepted. I certainly cannot give the time and attention which the position calls for.

With regard to nomination of my successor representing McGill I would suggest that Dr. Willey would be a very excellent representative, on the Board and I know would be very acceptable to the other members.

I was not nominated by the University but by the Department. McGill University is entitled by law to have a representative on the Board.

I am,  
Sincerely yours,

RFR/s.  
enc.
