Buildings whereas at the Stadium a new type of more economical building is possible -

It is greatly to be desired that in plans with regard to the development of the University there should be wise planning for the Centuries not for the decades and that undue attention should not be given to immediate necessities where the larger development may be damaged.

So far as I have been able to ascertain by far the great majority of the present students, the graduates men and women, and the members of the Staff are not in favour of the Sherbrooke St. Scheme -
