

Cases of expulsion, and of sickness, are the only exceptions to this rule.

Previous to leaving College, timely notice must be given, that accounts may be settled, and the necessary sum to defray travelling expenses be obtained.

The programme of studies in the college comprises three courses.

1st.—Commercial Course.

2nd.—Civil Engineering Course.

3rd.—Classical Course.

No student is admitted to any one of these courses before having given proof, by a satisfactory examination, of competent preparation to warrant his advancing to such advantageously.

The subject matter of these examinations is expressed in the programme respectively for each course.

The Commercial Course is so arranged as to enable students to embrace either or both of the remaining and superior courses. But those who desire to bring their studies to a close at this epoch, have already acquired such an education as may befit them to embrace many states in life which do not require the more advanced studies.

Students who have followed the Course of Civil Engineering, and passed therein a satisfactory examination, receive a certificate in attestation of the branches studied, and of the success by which their talent and application have been rewarded.

The college of Ottawa being by Act of Legislature, bearing date 15th of August, 1866, endowed with University powers, confers the degress of "Bachelor of Arts," and "Master of Arts," on such students as have successfully followed the prescribed classical course.

In order to receive the degree of "Bachelor of Arts," students must undergo two oral, and two written examinations—one of each at the end of their first five years—upon all the subject matter of their Classical Course, and again at the close of their seventh year upon Philosophy, Mathematics, and the higher sciences.
