thirty years to come, or more. Is it wonderful, with such things passing before their eyes, that men should become republicans? — when they see their fellow settlers in the neighbouring States, men of the same British descent, free from such gross misapplications of the public funds? Those rights and that royalty were vested in the Crown in trust for the good of the people — not intended to supply the extravagance of a favourite. And is it wonderful that Nova Scotia should be ill-peopled? A natural source of wealth, which might have given a livelihood to thousands, is made over to a Company residing across the ocean, who have never yet succeeded in working it to advantage. Who, besides, will take land on which the Company's servants may at any time enter under pretext of searching for minerals? A local writer, speaking of this monopoly, and of the high price of coals, and insufficiency of supply consequent thereon, remarks,—“This is what they call British protection. We call it plunder. We are laid under contribution, exactly as if a hostile army had invaded us.”
