Sprains, Strains, Cuts, Wounds, Ulcers, Open Sores, Bruises, Stiff Joints, Bites and Stings of Insects, Coughs, Colds, Contracted Croup, Rheumatism, Neuralgia, Whooping Cough, Sore Throat, Quinsy, Bronchitis, and all Painful Swellings.

A LARGE BOTTLE, 25c.

KETTLE VALLEY RAILWAY

Completed, Joining Republic Camp, Wash., and Grand Forks in British Columbia.

AN IMPORTANT INNOVATION

Republic Camp Ores Will Now Be Brought to the Granby Smelter for Treatment.

Grand Forks, April 17.—The Republic and Grand Forks Railway, known as the Kettle Valley Line, has been completed and opened.

The record of construction is regarded as noteworthy, considering that the first sod was not turned until June 5 last, and that the entire work was not under contract until August 3.

This latest international link which will have a great economic effect on the development of the Boundary country and the Colville Indian Reservation, situated in the State of Washington, is 42.56 miles long.

The necessity of establishing railway communication between Grand Forks and Republic had long been obvious, more especially since the failure of the various methods for treating the Republic ores at home by various adaptations of the cyanide process.

The Republic and Mountain Lion mills have both been closed for nearly a year, the latter mill, in its unfinished stages, stands as a monument to the folly of capitalists, who disregard the opinion of experts, that, by smelting alone, could the ores of the camp yield the highest returns at the minimum of cost.

There was the further dictum of metallurgists, since confirmed by actual experiments, that the highest grade could be obtained by blending the silicious ores of Republic with the sulphidic ores of the Boundary. This process, they averred, would prove mutually beneficial, the Boundary ores helping to reduce the cost of the latter, by their superior richness, contributing to enrich the matte.

Hitherto, the long and expensive wagon haul from Republic precluded the possibility of any but the highest-grade ores being treated at Grand Forks. Silicious ores, however, have been made from time to time, and only of picked ores, averaging, in some instances, \$500 per ton. These values cannot be regarded as characteristic of Republic, which, broadly speaking, is a camp with millions of tons of low-grade ore. Probably an average would be \$12 per ton. The project of a railway between the two points met with its hearty support. In fact, the management at one time contemplated building the line, only abandoning the idea when a charter had been secured by other parties.

The northern terminus is situated in the Buckle addition of Grand Forks, just south of the city limits. After crossing the C.P.R. track, the railway, following an air line, traverses the Kettle Valley north of the international boundary, less than four miles distant. Here it crosses the east and west, passing thru the village of Nelson, Washington, ascends the west bank of the river, over nine miles to a point one and one-half miles north of Curlew, Wash., and re-crosses the Kettle on a 45-foot Howe trestle.

Leaving the river at Curlew on its southeasterly descent from Canada, the line continues south thru the wide and open valley of Curlew Creek to the north end of Curlew Lake. Thence

following the west shore of that beautiful sheet of water, the road begins the nine-mile ascent in a southeasterly direction to the summit, which is overcome thru a natural pass. Two miles beyond, on the opposite slope, the line taps the Tom Thumb mine, before ascending the Mountain Lion. Then the railway swings around the mountain from that point, along Granite Creek to the Morning Glory at Curlew, before going north up Eureka Creek, and passing the San Poi, Bodie, Black Tail, Lone Pine, Silver Dollar, Knox Hill and other well known properties.

The altitude of Republic is 1000 feet higher than Grand Forks. This elevation is overcome by a compensated minimum grade of one and one-half per cent. As the bulk of the traffic will flow in that direction the cost of operating trains on the descending grade should be moderate. From an engineering standpoint, the route was admirably chosen, and great credit is due the chief engineer, John A. Mansel. It is the most direct route that could be secured, and withal is characterized by the absence of steep grades or sharp curves, indeed, the only heavy work encountered along the entire line was at Trout Creek, near the summit, where the hard rock cutting was found to be necessary, and earth excavations, also on the north slope of the summit.

The Kettle River valley thru the greater part of its length is practically a level plain. At Curlew, Wash., it crosses the Curlew Creek valley, but they are seemingly one, flanked on either side by grass-covered hills, or rolling hills, which are covered with wooded portion of the route thru the Kettle River valley extends for about eight miles north of Curlew, to the alpine. Midway in this forested reverse was obtained nearly all the timber required for the construction of the line. Beyond Curlew and until the ascent from Curlew Lake to the divide is level, the line runs thru the Curlew Creek valley, which is a level plain.

The rapidly with which construction work was rushed is due to Charles Ferguson, a veteran Spokane contractor, with an experience of over 20 years in building railways. Mr. Ferguson (Ferguson & Co.) was the contractor on Aug. 1 last, and subsequently re-let considerable portions of it in small contracts, the largest not exceeding \$50,000. In this manner it was found that better and quicker results could be secured.

The dominating spirit of this enterprise is Tracy W. Holland, Mayor of Grand Forks. Mr. Holland was the first to perceive the commercial possibilities of a railway between the American camp and the Canadian smelting centre, and to its accomplishment he has devoted his time and energies with rare singleness of purpose for nearly two years.

To arrange the preliminaries was no easy task. In August, 1900, he obtained from the British Columbia legislature, after a hard legislative fight, and by a majority of one vote, a charter authorizing the construction of a railway from Grand Forks to the international boundary line. There was yet to be secured the authority for building the American section of the road, between the frontier and Republic. The Colville Indian reservation is administered by the United States government. Mr. Holland found it necessary to pay half a dozen visits to Washington.

His first visit was in 1900, and was accompanied by W. C. Morris, a bright young attorney of Republic. Mr. Morris now carries the position of general counsel and assistant general manager of the road.

Altho the obstacles at Washington at first looked insuperable, they both resolutely stuck to the task. They both overcame serious objections, and provided guarantees that the existing rights of the Indians would be safeguarded, and that ample compensation for traversing Indian allotments would be paid. The zeal of the Interior and Indian departments for the security of its dusky wards could not have been more scrupulous.

One by one, objection after objection was overcome, and, finally, the order authorizing the building of the railway was signed by R. A. Hitchcock, Secretary of the Interior. Every Indian claim for damages has been adjusted, and that, too, at the arrangement of officials of the United States government.

After the organization of the Republic and Grand Forks Railway (now known as the Kettle Valley line), Mr. Holland became its general manager. The capital required for building the road was raised in 1901, and the president of the enterprise being Hon. J. R. Stratton, who holds the portfolio of Provincial Secretary in the Ontario cabinet.

Mr. Holland has resided in this Province for six years. He is only 33 years old. He was born in Hamilton, Ont., and for a number of years was engaged in the banking business in Winnipeg. He removed to Vancouver as Provincial manager

of the Kettle Valley line. He is a native of the Province of Ontario, and is a member of the Ontario Club. He is a member of the Ontario Club. He is a member of the Ontario Club.

Armond's Fashionable Hair Goods and Hair Dressing.

Style A. Armond's Safety Fringe, light Dressing, very latest, \$2.00. Fashionable Hair Ornaments. Mail orders promptly attended to. Catalogue on application. Best quality and lowest prices.

GREY HAIR—Dull, colorless or dry hair restored to its original beauty by our electric system, which is the most beneficial in use.

HAIR AND SCALP TREATED with our electric system, which is the most beneficial in use.

Electric Face Massage, Steaming and Manicure Parlors.

Appointments should be made a few days in advance.

J. TRANCLE-ARMOND & CO., 441 YONGE AND CARLTON STS., TORONTO, ONT.

of the Dominion Permanent Loan Co., and subsequently the position of manager of the Grand Forks Townsite Company. Since locating in this city, he has been deeply interested in all matters affecting the interest of the city and the Boundary country generally.

He was elected Mayor of Grand Forks by acclamation.

The Kettle Valley Lines have entered into a contract with the mine-owners of Republic for the transportation of ore to the Granby Smelter in Grand Forks. According to contract, the freight and treatment rate must generally be lower than that of a tonnage of 400 tons daily is expected.

This amount can be easily absorbed here, as the local market has a daily capacity of 1500 tons, and two additional furnaces are to be installed at an early date; moreover, the ore of Republic, besides being smelted in the furnaces, can be utilized as a converter lining.

Within a year, the tonnage of Republic, it is believed, will reach one thousand tons daily, as the opening of the road is having a stimulating effect upon development work; besides, a large number of mines has been guaranteed by various properties contiguous to the railway at several intermediate points, such as the Kettle Valley Mountain and Lambert Creek.

The road is splendidly equipped with rolling stock, including pressed-steel ore cars and passenger coaches. An arrangement for the carrying of through traffic from Grand Forks with the C.P.R. had been effected.

Commercial Lodge At Home. Over 100 couples attended the annual at home of Commercial Lodge, No. 20, S.O.E.B.S., in St. George's Hall last night. President George Haslam presided. A musical program was given by the lodge members.

Cliffers on Parade. The 48th Highlanders turned out 454 strong at the Armouries last night. Major Robertson in command. Company and battalion drill was practised on the parade ground.

Dr. Chase's Ointment. To prove to you that Dr. Chase's Ointment is a certain cure for all kinds of skin diseases, and every form of itching, we have prepared a special list of our dealers, who will send you a sample of our ointment, and you can see for yourself how it works.

AMATEUR BASEBALL PROGRAM.

Teams, Players and Positions for Saturday Games Follow.

The team to represent the Carpet Company in their game with the Street Railway Company at Exhibition grounds this afternoon in the first round of the International League will be composed of the following players: Goal, F. Long; backs, J. Robinson, J. Marshall; firsts, J. Stinson, A. Robinson, E. Crossland; left wing, I. Christie, A. Bondart; centre, J. Fairbridge; right wing, E. Brown; pitcher, J. Stinson; catcher, B. Fisher; F. Coakson. The Carpet Company will play the Street Railway at 2:30 p.m. The game will be arranged by a team outside the city on Monday night. J. E. Phillips, secretary, 294 Dufferin-street.

The Marlboro II will play the Standard a practice game with the Alps on Saturday afternoon. The following will represent the Marlboro: Lee, Martin, Brown, Lewis, Keating, Mowsey, Kerr, Long, Conna, Cotte, Galtie, Webster and Hannan.
