CARS OF COAL IN G.T.R. YARDS

Out in the southwestern part of the city the citizens are hounding a pliantive little city official, "Coal, coal everywhere and not a pound to burn."

A World reporter and the artist trudged over a mile of tracks from Dufferin-street east to the stock yards yesterday afternoon, investigating stories of the people of that part of the city that nearly all the winter the miles of side tracks have held from 50 to 100 cars of coal.

With a new breeze sending the fine particles of snow cutting like glass over the paved portion of the human anatomy, the heavy expense of trucks was saved. Seventy cars of coal were counted, 25 of which were of the soft variety.

Not Moved for a Month. A citizen residing adjacent to the portion of the yards, said: "I believe at least 50 cars of this coal have been on one track without being moved for at least a month."

Loose Coal on the Ground. The yards in that section would make rich picking for the poor of the neighborhood if they were permitted to remove the pieces from the ground.

Yesterday's Coal Arrivals. According to the railway authorities, coal came in slowly yesterday. The total amount now in the yards is 105 cars. Of this there came in over 120 cars of soft coal and two of soft and over the G.T.R. 10 cars of hard and 10 of soft.

CARS OF COAL STALLED NOT MOVED FOR MONTH

Long String of Them in Yards Near Exhibition Grounds—What's the Matter?

Out in the southwestern part of the city the citizens are hounding a pliantive little city official, "Coal, coal everywhere and not a pound to burn."

The Dry Cough of Bronchitis The Distressing Asthma Gasps

The chest pains and soreness, the tightness and desperate struggle for breath, with recurring and increased violence, drive many to despair who have not yet learned of the efficiency of

Dr. Chase's Syrup of LINSEED AND TURPENTINE

Bronchitis and Asthma are very similar in nature and frequently go hand in hand. They require similar treatment, for in both diseases the distressing symptoms result from contraction and closing up of the bronchial tubes and hence difficult breathing, coughing and expectoration.

Dr. Chase's Syrup of Linseed and Turpentine not only affords prompt relief, which in itself is considered sufficient reason for its use, but actually cures these ailments and prevents their recurrence.

Bronchitis is most dreaded because it has a tendency to become chronic and return again and again until the patient becomes worn out or falls an easy prey to consumption or pneumonia.

Because it is mistaken for an ordinary cold bronchitis is too frequently allowed to fasten itself on the system. Just as soon as there is a feeling of tightness in the chest or soreness on taking a long breath you have reason to fear bronchitis and any delay at this point is dangerous to your health.

Be Suspicious of the Substituter

When you decide that Dr. Chase's Syrup of Linseed and Turpentine will be of benefit to you do not allow your dealer to persuade you to accept something said to be "just as good."

LETTER FROM LADY DUFFERIN

Read at Fourth Annual Dinner of Dufferin School Old Boys.

The fourth annual dinner of the Dufferin School Old Boys' Association, held in Webb's parlors last night, was an unqualified success.

The toast to "Ape King" was proposed by Vice-President Arthur Bickell. Then followed the toast to "Our Country," proposed by Controller Loudon, and responded to by Dr. Harley Smith.

A G.T.R. official explained that this part of the yard was used as a relay point for coal cars and that the number was being constantly changed, new ones being brought in and old ones taken out daily.

Not Moved for a Month. A citizen residing adjacent to the portion of the yards, said: "I believe at least 50 cars of this coal have been on one track without being moved for at least a month."
