FOR THE WOMAN THAT'S FAT A Detroit physician says that the cheapest and safest mixture a fat woman who wants to get thin can use is one-half ounce Marmola (get it in the original half-ounce package), three-quarters of an ounce Fluid Extract Cascara Aromatic, and four and three-quarters ounces Syrup Simplex. The proper amount to take is a teaspoonful after meals and at bedtime.

These ingredients may be obtained from any druggist at small cost and make a combination that is not only excellent as a fat-reducer, being able, it is claimed, to take off a pound a day without causing wrinkles, but is also a splendid help to the system as a whole, regulating the stomach and bowels (where the fat person's troubles begin) and clearing the skin of pimples and blotches. No exercise is required to help the remedy in its work, and, best of all, no dieting is necessary when taking it—you can eat what you like.

Ten Chances to One for the Baby.

"A century ago the anxious parent of the new-born babe had good reason to be uneasy," says Dr. Woods Hutchinson, in writing on "The Increasing Tendency of Babies to Grow Up" in the February Woman's Home Companion. "That was still the age of dirt and a huge infant mortality. Less than half the children born lived to be 5 years old—in London, in 1760, 74.5 per cent. died—and more than one-third perished in the first year. Now such a condition is rapidly disappearing, and remains only in our slum and most ignorant peasant communities."

To-day the average mortality in the first five years of child life in the entire United States is less than 20 per cent. The mortality for the first year, about 10 per cent., and eliminating the slums and our foreign population, the rate is nearly 3 per cent. lower yet. So that your baby, gentle reader, has ten chances to one of reaching his first birthday, five to one of reaching his fifth, and three to one of attaining adult life. Surely this is not an outlook to justify serious worry or constant anxiety for fear that some dreadful thing will happen."

Snowplow and Shovelers Lost to the World—Passengers Reach Walton.

GUELPH, Feb. 3.—(Special).—On Saturday night, all day Sunday and part of to-day this city and section has been in the teeth of one of the worst storms that have swept the district, and blocked the railroads in a number of years. The Guelph and Goderich line of the C.P.R. is the hardest hit of them all. On Sunday evening a train of three cars, drawn by two of the most powerful engines on the line, left here with about one hundred and twenty-five men on board. Three engines were dead between Milverton and Goderich. One was attached to a snowplow, one to a freight and one to a passenger train, and it was in the hope of finding these that the relief train went out.

Word was received here that the passenger train had reached Walton safely, and that the people were all there, but the snowplow and the freight no word has been received, nor is it known where the big shovel brigade is. Another train with a snowplow left at 7:30 this evening to help them out, and expects to have the line clear by morning.

Terrible Experience of Crew on Waterlogged Brig Aquila—The Rescue. GEORGETOWN, P.E.I., Feb. 3.—Capt. Basil Kelly of Summerside and three members of the crew of the shipwrecked brig Aquila arrived at their island homes yesterday, left Shelburne, Nov. 29, for New York. For five days the crew were exposed to terrible hardships, suffering from cold and hunger. The vessel sprung a leak, the sails were blown to pieces and she became unmanageable. The crew only wanted a favorable opportunity to abandon her. She was driven to the eastward. Two steamers passed by without responding to their signals of distress. Naples, picked them up, taking them to the latter port. One of the men, exhausted by exposure, became violently insane, but subsequently recovered. Thousands Starving in India

It is a historical fact that for centuries past thousands have died every year in India, from starvation. Here in Canada, in the midst of wealth and plenty, they die—die because of lack of food, but because they can't eat and digest. To be strong and energetic you must eat plenty of food—but eating is useless unless digestion is good. If you are thin, pale, sickly—answer this question, Do you eat and assimilate enough wholesome food? If not, then you require Ferrozone—first, because it creates appetite; second, because it quickly converts what you eat into the kind of nourishment that makes muscle, bone and sinew. Everyone gets well, sleeps well and looks the picture of health when they use Ferrozone. It rebuilds weak constitutions, fills the system with energy and vim, establishes robust, happy health. Physicians prescribe Ferrozone because it contains all the elements that a system tonic requires, and say it does wonderful good to the young and old alike. In search of better health, you can't do better than use Ferrozone. Sold in 50 cent boxes or six for \$2.50 by all dealers.
