400 GALLONS ALCOHOL SEIZURE MADE AT HAMPTON

400 GALLONS ALCOHOL TAKEN FROM BOX CAR

Consignment Billed From St. Martins as "Lumber"

NO ARRESTS YET

Local Inspectors Also Visit Village But Find No Further Trace

GOOD work on the part of William Case, sub-inspector, and Inspectors Harry Pike and George Armstrong and Customs Officer Roy Armstrong resulted last night in an important liquor seizure being made at Hampton Station, where alcohol valued at \$4,000, and possibly amounting to a great deal more, was located in a box car there.

Inspector Case and his assistants had been out night after night working on this case and last evening they left here at 6.30 o'clock and drove to Hampton by automobile.

CAR ON SIDING.

On arrival there they traced the car and found it on a siding at Hampton Station. The car was ostensibly loaded with lumber and had been sent from St. Martins, consigned to Saint Paul Cote, a suburb of Montreal.

Inspector Case entered the car and by aid of a flashlight saw some large iron drums under the lumber. Sufficient drums were removed to ascertain that there were at least 30 drums in the car, of a capacity of 20 gallons each, and it was said that there might be as many as 40 in the car.

The inspector had the car diverted to this city, where it will arrive this afternoon or evening, when the lumber will be unloaded. The liquor will be handed over to the customs authorities, as it was thought that it had been smuggled, and will be placed in a bonded warehouse.

VISIT ST. MARTINS.

Inspector Case left Inspector Pike in charge of the car until its arrival in Saint John and returned to the city at 1 o'clock this morning.

Herbert Kilpatrick, as well as other cars were being loaded there. Four cars were searched, but no liquor found. The inspectors returned to Saint John about 7 o'clock this morning.

It was thought that the alcohol taken last night, was to have been unloaded near Montreal, and then taken across the border to the United States, as an opportunity offered.

RESULTS SHOWING.

The local inspectors have been doing much quiet work in trying to clean up this traffic and results are now commencing to show. There are two or three other places near the city from which it is thought contraband liquor is being shipped.

The duty paid value of the alcohol seized last night is about \$15 a gallon.

ALMA INSURANCE MOSTLY HELD HERE

Amount Not Definitely Known This Morning—Check-up Being Made

Most of the insurance on buildings destroyed in the fire at Alma yesterday was placed through Saint John agencies, it was learned this morning, but the exact amount is not known as there is some doubt as to whether certain buildings shown on the insurance charts escaped. Representatives of Saint John agencies went over the Albert county border today to check up. The Sun Company, Frank R. Fairweather & Co., agents, hold \$10,000; the Liverpool, London & Globe, \$6,000; the Ocean Company, \$1,000 and several other agencies have small amounts on the burned property.

The insurance chart shows that the fire must have spread in several places by means of burning shingles. Buildings owned by D. T. Alexander, including house and store; Lifford Dixon and James Thompson were in the path of the flames, but according to Hopewell Hill advises they escaped destruction. The total loss is estimated at at least \$75,000, on the 24 buildings and other property destroyed.

Alma is located on Chignecto Bay and is only seven miles from the Saint John county line.

Sphinx x Wholly Revealed For First Time In 20 Centuries

CAIRO, June 5.—For the first time in 2,200 years the Sphinx is now entirely visible. The accumulation of sand which since Ptolemaic times has been filling up the depression in which the Sphinx stands and which had buried all but the head, back and shoulders of the Sphinx, has been carried away by an army of workers and this seventh Wonder of the World today again stands fully revealed. No less than 800 boys and girls and a large corps of skilled masons have been employed for months in the excavation and renovation of the Sphinx. Once again the giant paws have come to light in their entirety and between them has been found still intact the tiny shrine built by Thothmes about 2000 B. C. This was last examined during some minor excavations in 1817. The memorial stone to this shrine bears an interesting inscription describing how the Sphinx appeared to the Prince in a vision when he had fallen asleep in its shade after a hunting expedition. In his dream the Sphinx told the Prince that he would become King, but made him promise to clear his image from the sand in which it had become buried. Subsequently the Prince came to the throne as Thothmes IV, and the monument records that in the first year of his reign he fulfilled his dream-promise. Thothmes IV, also caused all but the head of the Sphinx to be encased in limestone masonry about a foot thick to protect it against the wear of time. This masonry covering is still perfect on the enormous paws and lower parts of the monument. Some of the red pigment with which the monument was covered also remains, and on the breast are traces of the huge statue of the king who originally had the Sphinx produced.

EPIDEMICS CAUSED 40,000,000 DEATHS

Red Cross Figures For 12 Years Show Tenth of World Population Killed or Hurt

WASHINGTON, June 5.—Epidemics with a total of 40,000,000 deaths have claimed more lives throughout the world since 1914 than all the wars and civil strife since that year, the second Pan-American Red Cross conference was told by T. B. Kitteridge, assistant director of the League of Red Cross Societies. The 22,000,000 lives lost in world disasters since 1914, Mr. Kitteridge said, 9,000,000 were lost in war, and 13,000,000 in civil strife. Injuries during the same period totaled 140,000,000. Epidemics caused 100,000,000 of those and war 20,000,000. The number of dead and seriously injured in disasters since 1914 constituted one-tenth of the world's total population. Eighty-five per cent. relief contributions for disaster-stricken countries came from the American continent, Mr. Kitteridge said, 75 per cent. of the total coming from the United States.

At 106, She Thinks Women Talk Too Much and Should Stop It

NEW YORK, June 5.—Mrs. Soela Mass, a resident of the Harlem Home of the Daughters of Israel, is 106 years old, and knows why. "I never talked too much," she said yesterday. "Women ought to stop talking. If a woman talks long enough she'll say something foolish—a man will too. But if she keeps quiet people will say she is a very wise person. Ten measures of talk came down from Heaven. Women took nine of them and gave the tenth to the men. That's why the women don't get far. They ought to divide the talk again—five measures for themselves and five for the men."

SAYS BETTER UNDERSTANDING IS NECESSARY

Attacks Liberal Party For Stand on Railway Situation

SENATE REFORM

Former Premier Declares Policy Now Dead Issue; Speaks of Ship Combine

MONTREAL, June 5.—"I believe that there is need of a better understanding on the part of the two races. I who come from English-speaking Canada, ask of my fellow-citizens of the Province of Quebec to believe me when I tell them that the opinions held by the English Canadians of other provinces toward the Province of Quebec has been often misrepresented to them. The English-speaking Canadians are very well disposed towards their compatriots of the French race, and they are fully appreciative of the role played by the French population in the upbuilding of Canada."

RAILWAY SITUATION.

Turning to English railway situation. The Liberals who had denounced the nationalization of the railways, he said, were now the friends of nationalization. If it was a crime to amalgamate the roads, the government of that day had been forced to commit that crime. It had been compelled by circumstances and not by choice.

SENATE REFORM DEAD.

"Senate reform is dead," declared Meighen with emphasis. "It has resulted in a bill at the instigation of the Liberal camp and having enticed these votes, it is forgotten."
