Their Petitions.

When several persons combine in an effort to obtain desired privileges they are usually successful. There lies great virtue in numbers. Elsie, a little New England girl, was delighted with the prospect of a trip to California, and it never occurred to her that all her twelve dolls were not to go

also.

"Tell me where they're to be packed, mamma," she said, "and I'll put them in. They mustn't be rumpled and tumbled."

"Elsie, dear," said mamma, regretfully, but firmly, "I really can't allow you to take all that set of dolls. You may have two, any two you like, but there I draw the line. Twelve dolls are quite unnecessary."

Elsie made no reply, but went quietly on, altering a skirt for Lady Ethelinda, the prettiest one of the waxen and china-faced lamily.

prettiest one of the waxen and chand-aced iamily.

Later in the day, when her mother entered the room devoted to packing, she saw a curious sight. Supported against a trunk sat a row of dolls, in travelling costume, as lar as they could manage such, and above their heads was pinned a large placard, bearing the words, "We are waiting to be packed."

What mother could resist the united appeal of a dozen dolls? Not this one, and to California the twelve went.—Ex.

A Pat Answer.

"I saw Mrs. Bodkins today, William, for the first time since she became a widow. Shellooked perfectly grand in her mourning suit, and seemed so happy there was no standing her."

Bodkins."

"Perhaps, But what do you think she said? That if you had any taste you'd give me a chance to come out in mourning, too. That made me angry and I gave her a cutting answer she won't soon forget."

"What did you say?"

"I said I hoped that when it did happen I'd be as happy a widow as she was."

"Oh, you did."—Philadelphia Times.

A Doubtful Case.

Ile was in a sort of poetic frenzy.

'Oh, how I would like to sip the nectar of those lips; to drain to the last drop the sweetness of those cheeks."

She was an agreeable girl, but a minute or so after she said:

'James, have you been drinking that you seem so thirsty?"—Philadelphia

"I suppose to educate your daughter in music cost a great deal of money?" "Yes, but she's made it all back for

me."
"Indeed?"
"Yes; I'd been trying to buy out my next neighbor at half price for years and could never bring him to terms until she came home and began playing."—New. York Herald. A Bad Blunder.

A Bad Blunder.

Housewife (testily)—"Go way from this door, you old tramp! What do you want, anyway?"

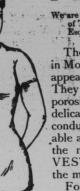

Seedy-looking man (starting off)—"I wanted to make you a call; I'm the new minister."—Drake's Magazine. The Quirks of English.

Maddox—"Look here, Simeral, don't you know that it's dangerous going into the water after a hearty meal?"
Simeral—"I'm not going in after a meal. It's a bath I'm after."—Racket.

Ignorance is Bliss. Gallant Customer—"This is very nice ods; won't you have a glass with me."
Soda Water Girl—"No, I thank you."
Gallant Customer—"Why not?"
Girl—"Well, you see, I see them make

The Ladies' Undervests manufactured in Montreal by the Montreal Silk Mills Co. appear to be as near perfection as possible. They combine warmth, softness, lightness, porosity, meeting all the requirements of a delicate, sensitive skin, and are especially conducive to Health in a climate so variable as that of Canada. They well merit the name of "HEALTH UNDER-VESTS," and are a credit to the skill of the manufacturers and a boon to the sex. For sale by every first class dry goods

How Gold is Shipped.

When one recalls the fact that millions upon millions of dollars in gold annually seek Europe to provide for the necessities of the import-trade, the question of how gold is shipped to Europe becomes an interesting one. The Bank of America is the largest single shipper of gold from New York, and indeed from the United States, Shipments are made in stout kegs, very much like the ordinary beer keg. Every one contains \$50,000 in coin or bar gold. The latter is the fayorite for these shipments, since the government has permitted the sub treasury to exchange coin for bar gold, as coin in a single million dollars shipment is liable to loss by abrasi

the head by the hardest of wax, and stamped with the consignor's name. The average insurance is about \$1,500 per \$1,000,000. Then there is an expense of about \$2 per keg for packing and cartage aboard ship, or \$200 for the same sum and the inevitable loss by abrasion, whatever it may prove to be. There are great Wall street firms shipping from \$25,000,000 to \$40,000,000 annually.—Ex.

There are various ways of coming to rief, when one attempts telling another

person's stories.

"Annie, tell that anecdote Cousin Olive told, the other night, please," said a young lady to her sister, while they were making a call. When Annie, had complied, her sister announced, sympathetically, to the company, "You can imagine how funny it was, because Olive tells a story so well!"

Another unfortunate relater of a borrowed tale was a gentleman who yentured to ask an intimate friend, "Why don't you wear a wir?"

an intimate friend, "Why don't you wear a wig?"

"I'd rather dye," was the answer, and though the pun was an old one it happened to be new to the hearer, and greatly amused him—not so much that he did not speedily forget the point.

That night, on returning home, he said to his wife, "Richardson said an awfully good thing this afternoon. I asked him why he dida't wear a wig, and he said he'd rather commit suicide than do such a thing. Why don't you laugh? But then, women haven't any sense of humor to speak of!"

— Youth's Companion.

A More Expensive Attracti

Excursionist (to the captain of a cheap excursion steamboat)—Any danger of the boat blowing up, captain?

Captain—Not in the least. We can't affort to blow people up at these low rates.

—Texas Siftings.

And They Moved.

Two pedestrians suddenly halted and looked up at a fourth story window. The lower sash was raised, and the head and shoulders of a child about two years old could be seen. In three minutes there was a group of dozen men and women, and the child had got its breast on the lower sill and was reaching out to get hold of a string hanging from the cornice—a remainder of some disaster to a kite.

"Heavens! he'll fall!" gasped one.

"Certain to smash down on to the pavement!" added a second.

"Stop! stop! Go back!" shouted a third.

Everybody had something to say, and

third.

Everybody had something to say, and while they were saying it the child wriggled further and further over the sill. At length a woman with a basket on her arm cried

a woman with a basket on her arm cried out:

"What fools you men are! Why don't you run and ring the bell and notify the mother?"

Three or four started, but they had not crossed the street when the child lost its balance and pitchel out head first. There was a murmur of horror, but it was checked as the fall of the child was stopped two feet below the sill, and there he hung, squalling, with a leather strap buckled about the right ankle. His howls brought a woman to the window, and she pulled him up, deposited him inside, and then said to the gaping crowd below:

"Thought I didn't know my business, eh? Well, I just do and you can move on "—N. Y. Sun.

Cast Iron Bricks.

What are termed hollow cast iron bricks form the subject of a recent German patent described in the technical journals, the article being the invention of an Eritiff mechanic. As the name indicates, they are made of regular brick form and size, the walls being 0.12 inches thick, but no mortar or other binding material is intended to enter into their use, the method of fastening adopted being as follows. The upper and lower sides of the bricks are provided with grooves and protecting ribs, which fit into one another easily and perfectly, so as to make a uniform and complete union or combination.

There are in addition two large circular openings in the upper side of each brick, arranged to receive suitably formed projections on the lower side of the brick above, one of these projections being also hooked shape, thus securing a more secure hold; and in order that the joints be made and remain air and water tight, a fluid is applied to the surface of the bricks with a brush. The non-conducting air spaces in the bricks, and the ease with which they may be put together and taken apart without injuring them, are cited as special advantages in their tayor as a substitute for ordinary bricks and brick construction.

—Chicago Jour. of Commerce.

The Fashion in Hair Dyeing.

Fashion in hair dyeing has, it seems, de-lared at last against the auburn and brigs, old tresses, with which we have been ately familiar. These tints, as well as the late "bleached" straw hue, are no longer pale "bleached" straw hue, are no longer to be worn, and a much darker shade, called in the secret circles of the trade itself by the unpoetical term "mahogany," is the latest decree. It is produced by a subtle mixture in which henna plavs a leading part; but the dyeing process is long and tedious. However, that cannot much matter to the ladies who once embark upon hair dyeing since they have contine to submit themselves to its repetition as fresh hair grows. The prophets of these mysteries assure us that the time is coming when a "natural brown" will be the favorite tone. If it' be true, therefore, the real blond hair, is becoming extinct, this will insure tashion to every one.—London Graphic.

How Smokeless Powder is Made.

Purified wool cellulose is gradually introduced into a very cold mixture of one part of fuming nitric acid and two parts of concentrated sulphuric acid until a thick pulp is formed. After six hours' contact, the pulp is washed, first with cold and then with warm and slightly ammoniacal water. The washed product is boiled in a concentrated solution of nitrate of, baryta, gently compressed, and dried at 40° C. In order to granulate it (an operation that is not indippensable), machines devesed for the purpose are necessary.

dispensable), machines dispensable), machines purpose are necessary.

It is probable that this smokeless powder is the same that was offered two years ago, by an English bouse, to the Austrian and German governments, and refused after an examination.—French paper.
