

DE NOBIS NOBILIBUS.

THE second year poet has produced an Epic entitled "Lowerwatha." We are sorry to hear that it is for private circulation.

In the land of Indian summer,
In the land where Yankee boodlers
Ever flee the Sing-Sing prison,
In the land which John A. bosses,
In the city named Kingston,
In a fair and stately building,
Where a broad and verdant campus
Stretches ever to the westward—
Came a whisper, low and dreary,
G—s is going to be courted,
We can only say "macte, puer, nova virtute."

I went to the At Home in the den,
But I won't go there again,
The moon shone bright, as the boys got tight,
And had a big time, O then!
But Jonathan he grew bold,
And danced when he was told,
The fiddlers ceased, and there was peace,
But Jonathan kept on dancing, dancing, dancing.
Tune Monkey.

Any one singing, whistling, or otherwise aiding or abetting "Little Annie Rooney" within these walls will be hanged.

Prof.—Mr. J., what is the shortest distance between two points called?

Mr. J.—(Confused)—Well, Professor, I don't like to be personal, but I suppose Guess is.

Rainy night, 2 a m., boarding house door, two Meds:—

"Late, late, so-o-o late (hie),
An' dark th' night an' chill-l-l!
Late, l-late, s-so la-a-ate!
But we (hie) canenter still-l-l!"

Head with night cap from above:—

"Tow late! Tow late!
You cannot enter now!"

Say, Billy, Prof. C— is a pretty good rider.

Yes, the English always ride well.

But Prof. Mc N— can't ride.

No, the Greeks weren't much at *that*.

I had a bright ray of sunshine on my *side* during the elections. She got all the girls to vote for me.—The *best* of the Sophs.

C. K. O. Cam-r-n—And is this *really* the Glee Club?
Frank H-go—O, no! It's the ladies' sewing circle.

There is an oft-repeated story of a student who had been fined ten shillings, bringing the sum in halfpennies. The professor turned the tables with "Ah! Mr. Z., I believe you are a halfpenny short; would you mind counting it for me?"

LEARN EVERETT SHORTHAND.

- 1.—Because it is particularly adapted to College work, having been invented by that distinguished British Scientist, Prof. Everett, of Queen's College, Belfast, who thoroughly understands what a College student requires.
- 2.—It is the briefest, legible system extant.
- 3.—It is simplicity itself, easy to write, easy to learn and easy to read.
- 4.—Hardly any grammalogues, while in Pitmanic systems these are counted by the thousand.
- 5.—Vowels are indicated even in the briefest reporting, therefore unfamiliar words in Greek or Latin can be written at speed and read afterwards—a feature which no other system can boast of.
- 6.—No one who has mastered its principles has given it up for another system, while numbers have abandoned the Pitman systems and use Everett's.
- 7.—No need of a teacher, simply procure a text book and learn the system yourself during the holidays.
