

COMMISSION TO STUDY UNIVERSITY - GOVERNMENT RELATIONS

MONTREAL (CUP) — The Ford Foundation announced Nov. 2 they will finance a \$150,000 study of relations between universities and provincial governments in Canada. The study, to be undertaken by a three-man commission, is expected to report in a year's time.

One representative from each of the Canadian Association of University Teachers (CAUT), the Association

of Universities and Colleges of Canada (AUCC), the Canadian Union of Students (CUS), and l'Union Generale des Etudiants du Quebec (UGEQ) will form a steering committee and will appoint the commissioners.

The commission will be mandated to: consider the role of universities in Canadian society determine the need, nature

and the extent of both university autonomy and public control of universities, and recommend appropriate instruments for establishing relations between universities and governments which do justice to their responsibilities.

"The question is", commented Jacques St.-Pierre of the CAUT, "how much control should be exerted by govern-

ment, which, as the representative of society provides a major part of university financing, and how much autonomy the universities must retain".

Robert Tessier, past vice-president of UGEQ and UGEQ rep on the steering committee said the terms of reference of the commission permitted an analytical study of basic principles.

"I'm very happy about our collaboration with CUS on the

steering committee", he said.

Doug Ward, past CUS president and CUS rep on the committee, was not available for comment.

THE CANADIAN METEOROLOGICAL SERVICE

offers

professional careers to bachelor graduates in

Physics And Mathematics Or Physics

(GENERAL, MAJORS, AND HONOURS COURSES)

as

METEOROLOGISTS - (about 15 graduates required)

Successful candidates are enrolled, at full salary, in a 2 year Master's degree course in Meteorology at McGill University, the University of Toronto, or the University of Alberta (Edmonton)

and

METEOROLOGICAL OFFICERS

- (about 50 graduates required) -

Successful candidates are given a 9 month in-service training program and then posted to the various civilian and National Defence weather offices across Canada.

These opportunities offer competitive salaries, challenging work and numerous employee benefits.

AIR CANADA

Place Ville Marie, Montreal 2, Canada Member/Membre de l'International Air Transport Association • Air Transport Association of America

In a lifetime of lectures, you'd never learn what the world is really like. You have to see it — the laboratory with three billion teachers. You might learn political economy from a Muscovite (or English from a Cockney bartender). Discover high finance in a Caribbean marketplace (or sales psychology in a Paris souvenir shop). Get a fresher course in ancient history (or just about anything) from a cabbie in Rome. Or be taught something new and unforgettable somewhere on your own continent. When you're ready to take the lab course in learning (and living it up), call Air Canada. We've got a good way to get you to class.
