

If you're tired of lazing on the beach all day or tired of seeing photos of other people lazing on the beach all day, come up to the Gazette. No experience necessary.

**Power tools for
the classroom.**

The TI-74 offers BASIC programming with a 113 BASIC keyword set. There's 8K Constant Memory and subroutine capability for advanced programming flexibility.

The TI-95 offers powerful 7200-step keystroke programming and features our exclusive Power Windows™ which provide easy access to the functions and flexible file management system.

TI programmable calculators have all the right functions and enough extra features to satisfy your thirst for power.

To all you science and engineering majors unsatisfied with mere calculators, TI has good news. Your power tools are

here. The TI-95 PROCALC™ is keystroke programmable and the TI-74 BASICALC™ is BASIC language programmable. Each has a full range of scientific, mathematical and statistical functions, and plenty of power extras.

Both have optional equipment such as Solid State Software™ modules,

including math, statistics and chemical engineering, and a module with an additional 8K Constant Memory. Additional power accessories include a separate portable printer and cassette interface.

So if you're into power, look for the display in your bookstore for a demon-

stration of our power tools. They build such a strong case for themselves, our competition doesn't know what to make of them.
