

	PAGE
The initial temperature of storage.....	52
Fayol quoted.....	52
Parr and Wheeler quoted.....	54
Parr and Kressman ".....	54
Porter and Oviz ".....	54
General discussion and conclusions.....	54
CHAPTER IV.	
The Oxidation of coal at ordinary temperatures.....	57
General discussion of occlusion vs. oxidation.....	57
Percy quoted.....	58
Lewes ".....	58
Fayol ".....	58
Cox ".....	58
Stansfield quoted.....	58
Haldane and Meachem quoted.....	59
Richters quoted.....	59
Taffanel and others quoted.....	60
Richters quoted.....	61
Haldane and Meachem quoted.....	62
Porter and Oviz quoted.....	65
Parr and Barker ".....	68
Parr and Wheeler ".....	69
Winnill quoted.....	86
CHAPTER V.	
The Oxidation of coal at elevated temperatures.....	103
Varrentrapp quoted.....	103
Richters ".....	103
Fayol ".....	108
Parr and Kressman quoted.....	109
Haldane and Meachem ".....	110
Lamplough and Hill ".....	111
Winnill quoted.....	114
Porter, Billington, and Cameron experiments.....	114
Description of first season's apparatus.....	115
Experiments I—IV, Billington.....	123
Description of second season's apparatus.....	124
Experiments V—XI, Cameron.....	136
Conclusions.....	144
Parr and Francis quoted.....	147
CHAPTER VI.	
The Prevention of fire in stored coal.....	149
General statement.....	149
Submerged storage.....	149
Ordinary storage.....	152
Canadian Pacific Railway storage methods.....	152
Porter and de Hart experiments at Glace Bay.....	154
Porter and Brimton experiments at Angus.....	159
General conclusions and recommendations.....	164
CHAPTER VII.	
The Effect of slow weathering on the calorific value of coal, with especial reference to certain Canadian cretaceous coals.....	167
