

DE LAVAL SEPARATORS

Save in 7 Ways

QUANTITY of cream that no other separator will recover completely, particularly under the harder conditions of every day use.

QUALITY of cream as evidenced by De Laval butter always scoring highest in every important contest.

LABOR in every way over any gravity system, and also over any other separator, by turning easier, being simpler, easier to clean and requiring no adjustment.

TIME by hours over any gravity system, and as well over any other separator by reason of greater capacity and the same reasons that save labor.

COST since, while a De Laval cream separator may cost a little more than a poor one to begin with, it will last from ten to twenty years, while other separators wear out and require to be replaced in from one to five years.

PROFIT in more and better cream with less labor and effort, every time milk is put through the machine, twice a day, or 730 times a year for every year the separator lasts.

SATISFACTION which is no small consideration, and can only come from knowing you have the best separator, and being sure you are at all times accomplishing the best possible results.

Easy to prove these savings

These are all facts every De Laval local agent is glad of the opportunity to prove to any prospective buyer. If you don't know the nearest De Laval agency simply write the nearest main office, as below.

NIAGARA TO THE SEA

A Quebec Caleche

Quebec is Old France—with a Difference.

All the charm of quaint old-world travel-haunts is reproduced in this city that stands guard over Canada. Yet Quebec is individual—distinctive—its "atmosphere" is all its own—its quaintness is of a quality that holds the interest even more surely than the Europe that was America's "Mecca" of travel. So you can come to this grand old town, with a certainty of enjoying a holiday quite as fascinating as any you ever had abroad. Our book tells all you'll want to know—tells all about our famous Niagara-to-the-Sea trip, and about our delightful Summer Hotels at Murray Bay and Tadoussac. Send 6c. in stamps to cover cost of mailing.

Wilkinson Plows

THE oldest line of steel beam plows in the Dominion, made in the old Wilkinson Plow Co's factory, by old Wilkinson Plow Co. experts—every one of them men who know their business. It is the standard line of plows and includes 25 or more styles to choose from—U. S. S. Self Center Steel Moldboards, highly tempered and guaranteed to clean in any soil. Steel beams, steel lindsides and high carbon steel coulter. Clevises can be used either stiff or swing. Each plow is fitted especially with its own pair of handles—rock elm, long and heavy and thoroughly braced. The long body makes it a very steady running plow. Shares of all widths—specials for stony or clay land.

General purpose, light, medium, and heavy, side hill, sod, drill or one horse plows

The plow shown turns a beautiful furrow, with minimum draft and narrow furrow at finish. Ask for new booklet.

Surround Your Lawn, Garden and Yards With

PEERLESS Lawn Fencing

ORNAMENTAL fencing serves a double purpose. It not only enhances the beauty of your premises, but also protects it and your children and property—as well. It keeps out marauding animals and trespassers. It protects your lawns and flowers and always gives your home grounds that orderly, pleasing appearance.

Peerless Ornamental Fencing is the result of years of fence building. It is built to last—to retain its beauty and grace for years to come and should not be confused with the cheap, shoddy fencing offered. Peerless fence is built of strong, stiff wire which will not sag and the heavy galvanizing plus the heavy zinc enamel is the best possible assurance against rust.
