SEED OATS.

"New Century," White.

Grain—The grain of the "New Century" Oat is white and very large in size, and has the largest meat in proportion to size of any oat.

Straw—The straw is very strong, and does not lodge even when others with less weight of grain in the head go down. The blade is nearly double the size of that of ordinary oats, and is good evidence of its inherent vigor.

Stools—The "New Century" Oat stools heavily, and is really remarkable in that respect. In a field this season there were sowed ten pecks per acre on part and the remainder was sown with seven pecks. It was absolutely impossible to see any difference in the appearance of the two parts, and no difference was noticed in the yield.

Hull—The hull is thin and easily separated from the meat, making them valuable for feeding.

Vigor—The remarkable vigor of this new variety is easily noticed in the growing crop from its first appearance above ground. One of our fields this season was sown with "New Century" Oats, and two days before another field with common oats. When the "New Century" Oats were seven inches above ground the others were not more than two. While common kinds suffered from excessive dry and cold weather the past spring, without exception the "New Century" Oats were a rich dark green.

HAVE YIELDED MORE THAN DOUBLE ORDINARY KINDS UNDER SIMILAR CONDITIONS.

Tested side by side with other oats, the "New Century" has actually double the number of bushels per acre. This can be partially attributed to the fact that in many cases the spikes or breasts will contain three full kernels where other oats give but two.

PRICE—Pound, 20c.; 3 pounds, 50c, postpaid. By express or freight—Peck, 50c.; bushel, \$1.50; 2 bushels, \$2.75; 5 bushels, \$6.50; 10 bushels, \$12.50. Cotton bags included. Address all orders:
