Handy Barns

Build your barn so that your stable work can be done in half the time it takes you now. Lay out the walks and passages to save multitudes of steps you take in feeding and cleaning. Put in a sling car that saves 75% of the hard work in filling the mow. Use a handy manure carrier for cleaning the stables, handy steel mangers, steel stanchions and other fittings.

Let This Barn Book Show You How to Build

It shows you how to build a barn from start to finish, and the right way to fix up cattle and horse stables to make barn work easy. It also shows how to lay the cement floors, how to build the walls and a simple, inexpensive method of framing the barn. It contains useful tables showing best measurements for mangers, gutters, cattlestands and passages; costs of cement work; best sizes for doors and windows; amounts of ventilation for different kinds of stock; capacities of silos and mows. There are many full page and double page pictures and blue print working plans.

This Book is Free

Thousands of dollars were spent in obtaining information, plans, photographs for this book, and in printing it. Yet we offer it free to any man who will write and state if he is building a barn, when he expects to start the work and the number of head of stock he will keep.

Simply Mail Coupon

A copy of it should be in the hands of every farmer who is going to build or fix up his barn. Simply fill in the blanks of the coupon and you will receive it by first mail. You do not obligate yourself in any way.
