## To Reduce the High Cost of Living and High Blood Pressure

By E. W. Ashley.

I have been afflicted with high blood pressure for several years and everybody is afflicted with the H. C. of L.

After reading up all the Health Magazines and books I own, and they are numerous, also making a search at the Carnegie Library on the above subjects, I resolved to make a test for at least one week, going particularly by Dr. J. H. Tilden's books of Denver, Colorado. I started in three weeks ago and found such satisfactory results after the first week that I continued it for three weeks as follows:

Breakfast	
Graham & Co. Evaporated apples stewed without sugar	3 1/2c
Figs or dates	3 1/2c
Figs, 2 oz. uncooked	3 1/2c
Cup hot water, 1/4 milk	1
Lunch	
Evaporated apples	4c
Figs or dates	4c
Lettuce	2 1/2c
Buttermilk	2 1/2c
Dinner	
Soup, fish, potatoes, bread and butter	30c
Total	61 1/2c

The above breakfast was varied a few times with prunes soaked 48 hours in cold water and eaten alone

without sugar. Dinner was varied a few times with a New England dinner, boiled ham and cabbage, not exceeding the above price, always secured at restaurants.

Many of my friends declared that I could not hold out on such a slim fare. To prove that my strength and energy did not falter for proof I refer to Mrs. H. W. Armstrong, of Maplewood Ave.; Mrs. C. J. O'Brien, Beverly street; Mr. and Mrs. Reid, Woodlawn Ave.; Mr. and Mrs. Reid, Oak Ave., Norwood; Mr. J. Young, Warsaw Ave., as I shot off my mouth to them from the time we took the train at 9 o'clock Saturday morning until we returned from Victoria Beach at 11 o'clock p.m., besides travelling around Victoria Beach with some of them for several miles explaining the beauties and advantages of the Fox Trot at Grand Beach. This feat I performed on the last day of the third week strictly on the above diet.

Since writing the above I have completed the fourth week on the same diet with such satisfactory results that I have decided to continue its indefinitely, except on state occasions as soon as I can obtain Bay of Quinte fresh apples at a reasonable price I will use them uncooked instead of the evaporated.

Instead of my strength and energy playing out as my friends anticipated, I find my physical strength and energy is much improved, being more efficient in every way and that indigestion with which I was very much troubled for 30 years entirely disappeared.

## Returned Soldier Saved From Lake

### Miss Daisy Thomson Goes to Man's Rescue in Uniform.

The man, who is still under medical treatment, was visiting his wife at the camp, and shortly before 4 p.m. thought a swim in the lake would be a pleasant change from heat and dust of the city. The storm of Friday night had considerably altered the beach at spots and the man apparently got into a hole and was immediately in difficulties. The alarm was given at once and Miss Thomson without waiting to dress herself of her uniform immediately went to his rescue and succeeded in bringing him to shore in a state of collapse.

He was immediately taken to the camp hospital tent and "strated" by Miss Thomson before he gave a thought to the discomfort of her own wet garments, and after a rest in bed was soon little the worse for his experience.

Miss Daisy Thomson is a member of No. 4 Nursing Division, St. John Ambulance Brigade, London, and saw service overseas as a V.A.D. She is also the holder of the Royal Humane Society's life-saving medal, which she won in England and of a gold medal for swimming.

## Production of Auto Tires Low

### Upward Trend Not Before November.

(Special to The Ontario.)

AKRON, O., Aug. 25.—Production of automobile tires, chief industry of this city, has reached low ebb of the year and 25,000 workers have been laid off, according to rubber company officials. Railroad and coal strikes, tightening of credits and lessening of demands following weather not encouraging to touring, are among reasons cited for decreased production.

No surplus labor problem is reported in Akron, as workers laid off have generally found employment elsewhere.

## Cannot Release Lord Mayor

### (Special 4 p.m. Dispatch from Canadian Press Ltd.)

LUCERNE, Aug. 25.—Premier Lloyd George in a statement today concerning the case of Lord Mayor McSweeney of Cork, whose condition is grave because of a hunger strike in Brixton jail, said in substance that whatever the consequences the Government could not take the responsibility of releasing McSweeney. The Premier declared he regretted McSweeney had decided to starve himself, but said that if he were released then all other hunger strikers would have to be released. The law which is a respecter of persons is no law, he continued in his statement. If the Cabinet therefore departs from its decision a complete breakdown of the whole machinery of law and government in Ireland inevitably would follow.

## Stand By Your Town

### If you think your town's the best, Tell 'em so.

If you'd have her lead the rest, Help her grow. When there's anything to do, Let the fellows count on you, You'll feel bally when it's through, Don't you know.

If you want to make a hit, Get a name, If the other fellows' it Who's to blame? Spend your money in your town, Thrusly keep your prices down, Give the mail concern a frown— That's the game!

If you're used to giving knocks, Change your style; Throw bouquets instead of rocks For a while; Let the other fellow roast, Shun him as you would a ghost, Meet his hammer with a boast, And a smile.

When a stranger from afar Comes along, Tell him who and what you are— Make it strong; Needn't flatter, never bluff, Tell the truth, for that's enough; Join the boosters—that's the stuff We belong.

Warsaw advices report the capture of Kpino near the East Prussian frontier, north of Lomza. More than ten thousand prisoners were captured in this region. Reports from various fronts, particularly in the northern sector of the line indicate that the Bolsheviks are demobilized and fleeing everywhere in great disorder. ## Pinck Danger From Flu

### (Special 4 p.m. Dispatch from Canadian Press Ltd.)

MONTREAL, Aug. 25.—That medical science was aware there would be a second influenza epidemic in 1918 and that steps were taken to guard the soldiers against it, with signal success, by means of a special method of inoculation, was the statement of Sir Kenneth Goadby, prominent London bacteriologist, on his way through this city to Boston where he is to lecture on latent infection.

He added that the deadly nature of this epidemic is due to certain microbe which can easily be rendered comparatively harmless if this method was adopted at the beginning.
