They Promise to Reach Large Proportions Before Long.

## ADDITIONS TO THE LIST

Late News From Republic Camp-A Discovery at Sheridan That Caused Notes of Interest-Etc.

of the camp this year promise to over- cessfully treat ore that contains more shadow even the fondest hopes of the than 3 or 4 per cent of iron or copper. friends who have pinned their faith to Another point is that cyanide frequently Rossland as one of the greatest mining that by this process is reduced in one fields in America. The War Eagle is hour. The chemical used is six times for he looks hearty and healthy. Mr. already shipping close to 1,200 tons per stronger than cyanide, and costs to Parker is a keen observer and a thorough week, and this figure will be increased manufacture, even in small quantities, as soon as the new hoisting machinery only 2 cents a gallon. From 50 to 80 and electrical apparatus can be installed.
The Centre Star, it is announced, will begin regular shipments of equal extent as soon as its new electrical hoist is in place. The Iron Mask is shipping place. The Iron Mask is shipping steadily and will no doubt increase its output as soon as the present legal difficulty. and electrical apparatus can be installed. cents' worth treats a ton of ore. The output as soon as the present legal difficulties with the Centre Star company can be settled. The Monte Christo is treatment. now numbered among the regular pro-ducers, and is sending its regular quota of mineral to the smelters. The Deer Park is making smelter tests with the view of sending out ore as soon as the easiest treated by the Stephens' process. easiest treated by the Stephens' process. In the Salida gold belt the ores abound now the Le Roi company, which at in iron copper and lime so that the discontinuous contraction of the stephens are considerable time before they recover confidence enough to again put money in mines, but those who understand the process are considerable time before they recover confidence enough to again put money in mines, but those who understand the process. present ships 200 tons per day to its Northport smelter, announces that on August 1 this tonnage will be increased 50 per cent, and after the first of next month the mine will be producing 300

tons per day. This epitome of the camp's shippers excludes the properties of the British America corporation, but as the latter are to be floated by separate subsidiary companies it is but reasonable to asgreat Columbia-Kootenay, will soon join shipped and treated for less than about the list of steady producers.

With such a galaxy of producing mines the Rossland camp can take undisputed place among the greatest min. ing districts in the world.

Le Roi Shipments.

On the first of next month the Le Roi will increase its shipments to 300 tons per day, which will mean the employand stoping is now in progress. The favored. ore gives about five per cent copper

Republic Is Prospering. C. S. Clarke, one of the employes of vicinity of which he and his partner have some 23 mineral claims. Republic, he says, at present is a little dull. This is owing to a large extent to the recent exodus to the south half of the reservation when it was thrown open to mineral location. This took away nearly all the floating population from the town. One storekeeper was awakened at 4 o'clock on the morning following the announcement of the opening and was kept busy all day delivering outfits to prospectors bound for the new field for prospecting. The Republic mine is turning out all right. Last month it shipped ore to the value of \$40,000 besides that which it worked in its own mill. In the other

development work is being done. that caused by the wonderfully rich strike made in the Sheridan camp on the Zala M.," said Mr. Clarke. "The assays from this property ran as high as \$105.40 in gold, 1,700 ounces in silver and a trace of copper. The Zala M. is owned by D. M. Snyder, Col. E. S. Topping, F. W. Rolt, Dr. the south of the Zala M. is the has collected \$500,000 in royalty. Discovery claim owned by H. H. Carter. The process is similar to the cyanide, but possesses many vastly superior points. The process is known as "The Non-Roasting Metal Extraction Process," and is all that its name signifies. All the metals are extracted by the ore solution and the ore is never roasted, simply crushed. The pulp is put into vats and the most refractory ore yet tested requires only an hour and 15 minutes to extract all metal from the pulp. Some ore requires only 30 minutes, while the average is about 45 minutes. Not only Considerable of a Flurry, and Other silver, copper, antimony and sulphur. The presence of iron or copper does not hinder the extraction of gold as The shipments of ore from the mines is the case with the well-known

occording the second

A Grass-Roots Proposition. One Hundred Dollar Ore on the Surface.

The officers of the Old Gold Quartz & Placer Mining company take pleasure in announcing to the public, that they have completed the purchase of the famous Silver King and Silver Queen properties of the Lardeau-Duncan country, and that the same have been amalgamated with the already promising properties of the Old Gold company. The Silver King and Silver Queen have two well defined and highly mineralized ledges running through the entire properties, each being over five feet in width. A number of assays have been made from the property, every one of which shows over \$100 in value and one reaches the magnificent sum of \$135.75. Average taken assays across the entire ledge give values of 102-37.

They are located only about one mile from the rich Gainer creek gold properties, are within three-fourths of a mile of rich placer grounds, are nestled among such well-known mines as the Bad Shot, Silver Cup, Wagner and Bannock Burn groups.

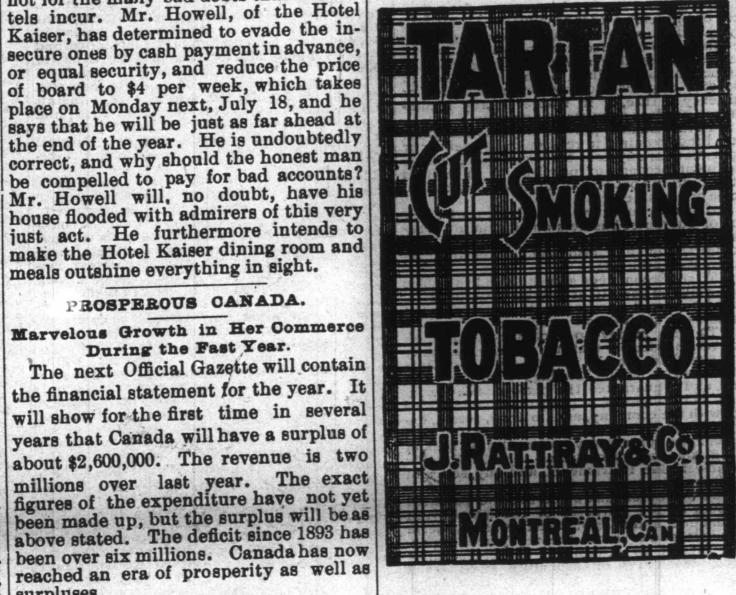

The Old Gold properties now consist of eight claims, (comprizing about 400 acres of mineral lands) six of which are on the North Fork of the Salmon river, one of the most promising gold producing districts in British Columbia.

The last assays taken from the quartz ledges on this group give the satisfactory results of over \$20 per ton. NOTE THE FOLLOWING FACTS:

1. A large area of rich mineral lands, 2. Low capitalization. 3. Shipping ore from the surface. 4. Water and timber in abundance. 5. No salaries to any officer until the property becomes Dividend paying. 6. A careful, Economical and honest management. 7. The company is out of debt, has a large fund both in treasury and unsold treasury stock, and is working its properties The above are some of the reasons why an investment in the shares

of the Old Gold Quartz & Placer Mining company at present prices is the most profitable that can be made in British Columbia. Only a limited number of shares will be placed on the market at 10 cents. An advance in price will soon be made.
