Tattersails, Great St. James Street.

March 28.

TO C. LAROCQUE, ESQ.

Str.—In compliance with your request, I now cheerfulfy give my opinion of the Plantagenet Waters, with which request I have bitherte decilined compliance until I could speak from experience of their virtues.

I was one among the first Medical Practitioners in this city to use these Waters, about three years since, and to recommend them to the use and notice, not only of my patients, but of my professional brethren; and I have much pleasure in easying that my sanguine expectations respecting them have been more than realized.

The chemical composition of the Plantagenet Waters, as Mr. Hunt's analysis shews, is a valuable combinations of Iodine and Bromine which they count these Waters most useful in gostric, hepatic, and nephretic affections, and is some forms of dropey. From the rare and valuable combinations of Iodine and Bromine which they contain, and their consequent action on the lymphatic system, I have found them useful in Gout, Rheumatism, Scrofula, and Calcareous disease. It is worthy of remark, that durins the prevalence of the Cholera in this city in 1849, I used and recommended them extensively, and their powers seemed to be prophylactic against that pestilence, as not a solitary case of Cholera rivocurred to my knowledge where a systematic and judicious use of the Plantagenet Waters had been made. I am frequently in the habit of prescribing them either alone or as a valuable adjunct to other remedies.

W. Marsden, M.D., No. 6, Anne street.

Quebec, 23rd September, 1851.

—ALSO,—

Quebec, 23rd September, 1851.

Analysis of the Water of the Goorgian Spring.

I have made a careful quantitative analysis of a quantity of this Water sent me by the Proprietor of the Spring. Captain Kains. It is a Saline Water, containing earthy Chlorids, with portions of Bromids and Jodids, thus resembling the Plantagenet Water, from which it differs chiefly in the presence of a portion of Sulphates, which are not often met with in Waters of this class in the Province. It has a specific gravity of 1008.78, and contains in one pound avoirdupois, the affixed quantities of the following substances:

[Grains. 66.92000] THE Subscriber will offer by Public Sale, at the Stores of Messrs. ISAAC BUCHANAN & CO., on TUESDAY, the 7th OCTOBER next, at TWO o'clock, precisely, a LARGE ASSORT-MENT of GOODS, consisting of—SUGARS, WINES of all kinds, BRANDIES, GIN, WHISKEY, INDIGO, PEPPER, PIMENTO, &C.
