THERE was a bright lad in a rush—
With both of his shoes yet to brush!
In a minute of time
POLO fixed up his shine—
And it stayed bright right through the slush.

POLO SHOE POLISH

IT TAKES less than a minute to put on a Polo shoe—just a few dabs, a quick rub and there's your shine! More over, if Polo does finally become dull, an easy brushing will bring back all its gloss. Ask your grocer or shoemaker for Polo—the polish in the big box, black or tan. The tan both cleans and polishes.

The Evening Chit-Chat

By RUTH CAMERON

I am not one of those people who see immediacy in every little thing. The folks who shriek "immediacy" at elbow sleeves and Dutch necks and thin stockings and peek-a-bo waistlines remind me forcibly of the old saying, "To the pure all things are pure."

But when it comes to women shadowgraphing the exact lines of their figures on the public consciousness the way so many of them do now—well, there's where I make my stand.

It wasn't so bad in the winter when the materials were thick and heavy, but now that they are thin and clinging—why, they describe the effect, you know as well as I what it is.

Watch any group of men in a public place where men and women are passing and see how quickly some of them glance after a woman dressed in this way.

Wouldn't you think those glances would burn right into her back?

In Japan, as you probably know, the women of that character are supposed to tie the sash in front instead of in the back. A Japanese on a visit to this country evidently thought he had discovered a parallel to this custom when he saw a woman in one of these exceedingly clinging gowns, for he pointed her out to his American companion and inquired, "That is what your women of the demi monde wear?"

One more word. Especially for the girl over whose head my previous remarks have passed, who is sniffling at my accusation of immediacy as all newspaper talk and assuring herself that I'm one of those who don't know or care anything about style.

Whisper, my dear, a dressmaker whom I know still wearing those abominable tight skirts," she said. "Why, they've dropped them long ago in Paris. They say they are ugly and impossible. I suppose you people will realize that in a year or two."

"What matter if my previous arguments against tight gowns have fallen flat? Surely I have an answerable one in that."

Stomach Blood and Liver Troubles

Much sickness starts with weak stomach, and consequent poor, impoverished blood. Nervous and pale people look poor, rich, red blood. Their stomachs need invigoration. A remedy that makes the stomach strong and the liver active, makes rich red blood and overcomes and drives out disease-producing bacteria and cures a whole multitude of diseases.

Get rid of your Stomach Weakness and Liver Laziness by taking a course of Dr. Pierce's Golden Medical Discovery—the Great Stomach Restorative, Liver Invigorator and Blood Cleanser.

You can't afford to accept any medicine of unknown composition as a substitute for "Golden Medical Discovery," which is a medicine of known composition, having a complete list of ingredients in plain English on its bottle-wrapper, same being attested as correct under oath.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels.

Fads and Fashions.

Satin and velvet are predicted as the leaders in suit materials for the fall. Irregular shapes and plenty of uncarved ostrich plumes mark the latest large hats as a rule.

Their prominence in the Coronation celebration has brought rich oriental fabrics again to the fore.

Sweet peas in their delicate pink, blue, lavender and pink shades, are ideal for the afternoon hats.

Hats of the Grand Steeplechase at Auteuil were enormous. Long ribbon streamers decorated some of them.

In spite of its simple effectiveness, not one woman wears a sailor-hat today where five wore them a few years ago.

Sleeves just now are half and three-quarter length, but there is a rumor afloat that they are to again be long and close.

A number of pretty skirts have the slash at the side or side front which gives opportunity for display of fetching footgear.

Odd satin and taffet coats in habit shape were in great favor at the recent great race, meetings of the French capital.

Lace gowns, lace coats, lace tugs, lace overalls, lace scarfs and mantles—lace abundant makes a prominent part in the summer wardrobe.

For bridesmaids, lace caps are in vogue. They drop over the hair in soft pleated folds and are trimmed with rows of silk of mousseline flowers.

Girls of fourteen and up are wearing their skirts very short. This, of course, means pretty shoes and hose, as white or tan lace or cotton stockings and pumps.

New jabots are lace trimmed and are worn with linen suits or separate blouses. The one fitted effect is evident, a wide rill being attached to a central rill of lace.

Velvet of all colors, especially black, bids fair to hold place as trimming even through the hot season. Nothing more effectively tones down such vivid colorings as are now fashionable.

A fashionable idea for linen and white frocks is to place a twelve to sixteen inch colored band around the bottom of the skirt, and then introduce a touch of the color in the waist.

Montreal Items.

On the night of Sunday, the 22nd inst., Montreal was given an opportunity to hear the famous Protestant preacher, Rev. Dr. Clifford, of London, England. Olivet Baptist Church was filled to overflowing and many stood outside the doors trying to catch what was said. The congregation stood and waved handkerchiefs when the rev. gentleman entered. Taking for his text: "And yet you are unwilling to come to Me that you may have life" (John v. 40). Dr. Clifford delivered a very thrilling and militant sermon. He showed what religion should be to him. It will be remembered that last September Father Vaughan stated in this city that "Protestantism was a religion without a soul." Dr. Clifford gave it as his opinion that far from being a religion without a soul Protestantism represented in the history of Christianity the recovery of the soul of religion—the recovery of the soul of Jesus Christ. It meant, he claimed, the disintering of truths which had been buried for centuries by the Roman Catholic Church. At the end of the service the Doctor shook hands with the majority of the congregation who wished him every success in his tour.

A tremendous heat wave has been passing over Montreal during this last week. The average temperature is 90 to 97° in the shade, which would give about 102° in the open. Many deaths have occurred due to the great heat. Not for thirty-five years has such heat been known, and it is to be hoped that it will not be met with for the same time to come. If it continues much longer its results are likely to be even more serious as it is possible that the water may be affected.

McGill University has again been the recipient of another handsome gift from one of its friends. This time it comes from Sir Wm. MacDonell, who has formerly given largely to the University. McGill now possesses the Molson-Law estate and this extends her grounds from Sherbrooke Street to the Mountain. This is one of the best University properties on this side of the world. Sir William MacDonnell's former gifts amounted to \$2,500,000, and this last is valued at \$1,200,000.

The event this week was the reception accorded Sir Wilfrid Laurier on his return from the Coronation. He arrived in this city on Tuesday night in the Government yacht. Thousands awaited him at the wharf but there were many more at the Camp Des Mars where he was escorted and where he addressed the people. Demonstration after demonstration was given him. The route from the wharf to the Camp Des Mars was decorated with banners bearing: "Welcome to Laurier," "Honorary Canadian" and such inscriptions. One of the prettiest sights imaginable was the arch of maple leaves and electric bulbs which was erected at the gateway leading to the wharf. The fireworks were splendid. Sir Wilfrid said that he was glad to get back to Canada, and it is certain that the people are glad to have him back. Perhaps he was never more popular than he is at this time.

Curious Calendars.

Trees and Stones That Tell of the Passing of the Years.

Saw through the trunk of an oak, count the rings, and these will tell you the age of the tree.

But they will tell you more than this. The rings vary in width, and, by studying them closely, you can say, "This year, eighteen rings ago, was a fine one. There must have been plenty of warmth and a fair amount of moisture for the tree to make big growth. And this, thirty-one rings ago."
