The Most Beautiful Car in America

A New Development in Light Sixes

Before we began experimental work on our new six-cylinder motor three years ago, we made a very thorough investigation of the light six field.

We found out just what qualities car owners desired in the power plants of their motor cars and then we designed an engine to meet these requirements.

The wisdom of our method is attested by the unanimous approval given our five-passenger "Glenbrook" model. With its first appearance, it immediately won the enthusiastic support of motorists.

And, by its dependable and economical performance, it has so clearly demonstrated its high character as an investment value that our production schedule is already proving unequal to the demand.

The "Glenbrook" is a truly remarkable development in five-passenger cars. Won't you arrange for a demonstration while our dealer is in position to meet your requirements as to delivery?
