DISCUSSES FEEBLE MINDED CHILDREN

Mr. W. L. Scott of Ottawa Addresses Women's Canadian Club.

Protection of feeble-minded children, the value of supervised play-grounds, and the successful work of probation officers of both sexes, were subjects dealt with most ably by Mr. W. L. Scott, of Ottawa, in an address on child rescue work delivered before the Women's Canadian Club of this city on Saturday afternoon.

The problem of feeble-minded children was one of the most vital ques. tions of the hour in Ontario, Mr. Scott stated, and unless remedial measures were taken at once, the problem would increase with the next generation. In his opinion such children should all be placed in institutions. There was but one institution of the kind in Ontario and it was overcrowded. Physical Defects.

"Many cases of juvenile delinquency are due to an abnormal condition in children who are originally physically defective," said the speaker. "In a number of diseases common to children, the system endeavors to overcome the defect, and this strains the nervous system to such an extent that an abnormal condition results. The usual characteristics of this are loss of

Mr. Scott cited a number of stances which had come under personal observation, where children who were developing criminal tendencies had been completely corrected and cured by an operation. The work of the Children's Aid Society in rescuing children was warmly praised by Mr. Scott.

Juvenile Courts.

Regarding juvenile courts, Mr. Scott said their objects and methods of working were entirely different from those of criminal courts. The juvenile court took three things into consideration, first, an appreciation of the great value of the child, both to itself and to the community; it recognized the fact of the child's home environment, which was often miserable and unhappy, if not a place where crime habitated, and lastly, the juvenile court advocated the abandonment of criminal punishment wherever possible. "The juvenile court may be termed as 'paternalism,' for it puts itself

In Ottawa the work of the juvenile court and probation officers had been been in the course of erection at the Hospital for Insane, to take the place of the one which was detrived by Dies at Los Angeles.-Word was ing out in the wrong way. Mr. Scott Deceased was in but a few days beys who were apparently hopeless. Probation Work.

"Probation work is much more than watching. It is instructive work. An Lizzie, who reside at 93 Maple street, officer should be tactful and firm, as well as kind. All the kindness in the world will not save a child unless judgment is also exercised. Even as a doctor cannot help a patient unless he knows what is the matter with him or her, so a probation officer must study the child's case and understand what is needed to correct that child." In the case of girls Mr. Scott fav-ored lady probation officers, especially in the fighting of the white slave traf-

The subject of the supervised play ground was spoken on at some length by Mr. Scott. In Ottawa they had had two of these play-centres under the management of the Local Council of Women, but this year a playground association was being organized which would assist in opening up ther playgrounds.

Supervised Playgrounds. matter of supervised playgrounds for children was a very vital subject, Mr. Scott stated, and he urged the ladies to take a personal interest

in the work in London. "A dollar spent in saving the child new means saving of many dollars

With Catarrhozone it was different. It cleaned my nose and throat of all phlegm and dis-MOUNTJOY—At his residence, 126 Mount
